BESSEY Group – The History

1889

Foundation of a bright steel drawing mill in Stuttgart by Max Bessey.

1923

Foundation of the Ernst Diener shears factory. Initially only Berlin pattern snips are produced.

1936

Patent for a new malleable cast iron screw clamp.
Manufacture of clamping tools begins.

1944

Construction of the current headquarters in Bietigheim

1979

Takeover of shears factory Ernst DIENER thereby expanding the BESSEY product range with ERDI snips.

BESSEY Group – The History

1994

Merging of the tools and precision steel works at the Bietigheim location

2003

Takeover of distribution partner in the strategically important North American market.

2004

Takeover of clamping tool brand GROSS STABIL as part of the global growth strategy.

Foundation of BESSEY Präzisionsstahl and expansion of the storage and production facilities.

2007

Integration GROSS STABIL TOOL into BESSEY Tool in order to increase synergy effects.

"One, who stops improving himself, has already ceased to be good."

(Philip Rosenthal, entrepreneur, born 1916)

This is the guiding principle by which
we deal and work every day.

It is the advantage created by ideas and quality that make the BESSEY brand unique.

BESSEY Group – Organisation

BESSEY Group

BESSEY Tool GmbH & Co. KG

BESSEY Präzisionsstahl GmbH

BESSEY Tool USA

BESSEY Tool Canada
