

**A one-day workshop to help
you take the first step toward
reducing your carbon footprint**

The Greenhouse Gas Emissions Challenge

All across North America, colleges and universities are under increased pressure to improve energy efficiency and reduce greenhouse gas emissions. Hundreds of institutions have already become signatories of the American College and University Presidents Climate Commitment (ACUPCC) and made a commitment to become carbon neutral. The question many of these institutions are asking is, “How do we get started?”

The First Step to Reducing Your Carbon Footprint

Finally, now there is a solution. Honeywell and Clean Air-Cool Planet have teamed up to provide a one-day, hands-on, interactive workshop designed to help college and university teams adopt the tools and methodologies they need to launch a successful energy and carbon reduction program.

Learn from the Experts

This workshop is the result of teamwork between two companies with exceptional qualifications in the world of energy and climate change:

Honeywell is one of the world’s leading energy services companies, with more than 50 percent of their portfolio of products and services linked directly with energy and environmental protection. Honeywell is one of the original signatories of the Clinton Climate Initiative, an inaugural supporter of the ACUPCC and the recipient of the North American Energy Services Company “Green Innovation of the Year” Award from Frost & Sullivan. Few companies see the whole energy picture as clearly as Honeywell.

Clean Air-Cool Planet (CA-CP) is a leading organization dedicated solely to finding and promoting solutions to global warming. They partner with companies, campuses, communities and science centers to help them reduce carbon emissions, understand the impacts of global warming and explore the best available solutions through comprehensive outreach efforts that celebrate commitment, innovation and success in climate action. To date, more than one-third of U.S. colleges have downloaded the CA-CP Campus Carbon Calculator™ – an easy-to-use tool designed to help non-expert users create standardized, accurate emissions baselines without having to reinvent complex calculation methodologies.

Together, Honeywell and CA-CP have created a powerful one-day workshop to help campuses wishing to utilize the full potential of the Campus Carbon Calculator™ and its related planning tools.

What You Will Learn

Honeywell and Clean Air-Cool Planet have designed this workshop to provide you with all the basic know-how you will need to launch an effective greenhouse gas emissions initiative:

- Calculate your own campus carbon footprint using the CA-CP Campus Carbon Calculator™
- Understand how to transition successfully from the greenhouse gas inventory to the climate action plan, and how the CA-CP Campus Carbon Calculator™ can aid in creating the action plan
- Build a multidisciplinary project team
- Create a sense of teamwork and cooperation within your institution
- Successfully adopt ACUPCC program implementation methodology

What You Will Receive

You will walk away with everything you need to launch a successful greenhouse gas emissions reduction program on your campus, including:

- An invaluable one-day, hands-on workshop
- The CA-CP Campus Carbon Calculator™
- Training and technical support from prominent experts in the field
- The ACUPCC Program Implementation Guide
- Customized exercises

Who Should Attend

Everyone on your multidisciplinary project team will benefit from attending this unique one-day workshop:

- Administrators
- Faculty
- Facility management staff
- Students
- Community representatives
- Public relations representatives

Workshop

- A hands-on, one-day workshop delivered on-site at your location
- Facilitated by energy experts from Honeywell and CA-CP
- Endorsed by the ACUPCC

On-site Consulting

- Provides additional on-site support to help generate your own Carbon Footprint Report

Workshop Agenda

1. Introduction, Agenda, Overview

What will you learn?

- a. Honeywell's approach
- b. Carbon inventory
- c. Clean Air-Cool Planet three-step methodology

2. What can your usage trends tell you about your carbon footprint? Establishing the baseline via data collection.

- a. Collection boundaries
- b. Collection journal
- c. Collect institutional data
- d. Collect Scope 1 emissions data
- e. Collect Scope 2 emissions data
- f. Collect Scope 3 emissions data
- g. Identify emission offsets

3. Calculate and Analyze Emissions

- a. Discussion and hands-on practice with the CA-CP Campus Carbon Calculator™
- b. Input data and analyze the results

4. Leverage Your Results

A facilitated discussion on how to plan for carbon management, handle public reporting, engage stakeholders and take advantage of the educational opportunities available to you.

Flexible Workshop Pricing

Because the one-day workshop is conducted on-site at your location, you are able to maximize the valuable time of your participants. Plus, you save the costs of travel, food and lodging associated with attending such a workshop at an off-site location. These points help make this workshop an exceptional value. In addition, we offer flexible pricing with groups of 5-12 persons, making this workshop affordable enough to send your entire team.

How to Register

There are two easy ways to register for this important Carbon Footprint Reduction Campus Workshop:

1. Request an on-site workshop online by visiting the Honeywell Building Solutions Training Services Web site at: **www.honeywell.com/buildingsolutions/onsiteclass**
2. Contact Honeywell Building Solutions Training Services directly via e-mail to: **acstraining@honeywell.com** with the subject line "Request Carbon Footprint Reduction Campus Workshop," plus detailed information regarding your preferred dates, location, number of people attending and coordinator contact information in the e-mail body.

Find Out More

Let us help you take the first step to reducing your carbon footprint with this informational and motivational workshop. To learn more about Honeywell Energy Solutions, visit **www.honeywell.com/buildingsolutions/energy** or call **1-800-345-6770, ext. 605**.

Honeywell Building Solutions

Honeywell
1985 Douglas Drive North
Golden Valley, MN 55422-3992
