---

# Kraus & Naimer

The development of the Blue Line rotary switch, contactor and motor starter product ranges is based on more than hundred years experience by Kraus & Naimer in the design and manufacture of electrical switchgear. Kraus & Naimer pioneered the introduction of the cam operated rotary switch and continues to be recognized as the world leader in that product field.

## BLUE LINE

Blue Line products are protected by numerous patents throughout the industrial world. They are built to national and international standards and designed to withstand adverse temperatures and climates.

Blue Line products are accepted and universally recognized for their quality and workmanship. They are supported by a worldwide sales and service organization.

The Kraus & Naimer Registered Trademark

## Construction Data

---

The large cam switch line of the A, C, CA, CAD, CG, CH, CHR, D, L and X-series is complemented by a large number of optional extras and enclosures.

This substantial number of optional extras and enclosures is needed in order to meet the requirements of the world market.

One or more optional extras may be used in combination with any one switch provided they are of the same switch size. A few exceptions where this cannot be accomplished are noted on the following tables. In some cases, for technical strength or esthetic reason, it may be desirable that a switch be combined with an optional feature of the next larger switch size. Many options provide for such a possibility.

Enclosures are manufactured from plastic or aluminum material. They offer a high degree of protection (up to IP 66/67) thereby permitting switch operation under adverse environmental conditions. The materials used provide considerable strength and the best possible protection against corrosion. A large number of possibilities exist for combining switches, enclosures and appropriate optional extras.

## How to order

Disconnectors and Main Switches with Optional Extras acc. to IEC 60947-3 see Catalog 500

When ordering Blue Line cam switches with optional extras, the following method of coding is required. Details on the enclosures and optional extras are shown in this catalog.

### 1. Switch Type

See Catalog 100, 110, 120, 130 or 140.

### 2. Switch Function

See Catalog 100, 110, 120, 130 or 140.

### 3. Type of Mounting

See Catalog 100, 110, 120, 130 or 140.

### 4. Enclosures

The assigned code numbers for the various enclosures are shown in this catalog on pages 23-26.

**CA20B**

**A202  
V840F/F**

**PN**

### 5. Optional Extras

Pages 4-22 list optional extras and their coding. A ● indicates the switch sizes in which the optional extra shown is available.

Possible combinations of switches of the same switch size with an optional extra of the next larger switch size are indicated by a ●. Only in this case indicate the next larger switch size in front of the coding.

There are some optional extras in existence which are available in a variety of programs. Additional ordering data may, therefore, be required. In the above case, a color description is required for the cover and handle disc.

### Terminal Lugs

	<p>For screw with wire clamps</p> <p>Terminal lugs facilitate the connecting of wires in installations where the terminals are not easily accessible.</p> <p>All X switches, L switches and switches type C315/ C316 will be supplied with terminal lugs as standard.</p>	<b>M900</b>					●	●
	<p>Terminal lugs for quick connect termination</p> <p>Each quick connect terminal may accept either one 6,3 mm quick connect lug or two 2,8 mm quick connect lugs.</p> <p>Switch type CA4 only accepts one quick connect lug 2,8 mm.</p>	<b>M930</b>		1 CA4	1 CHR10 CHR16 DH10 DK10	1 A11 A14 CHR10B CHR16B DH10B		

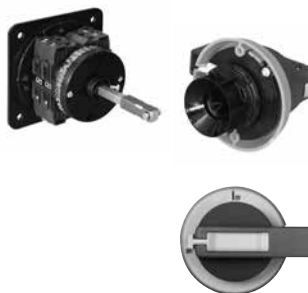

### Shaft Extension

	<p>With asymmetric profile</p> <p>Shaft length not adjustable</p> <p>Shaft with unlimited adjustable length with set screw with shear ring</p> <p>Adjustable shaft can be set to the desired length in a pre-mounted switch with VE mounting plate.</p>	<b>L100</b>					●	●
	<p>With square profile</p> <p>Shaft length not adjustable</p> <p>Shaft with unlimited adjustable length with set screw with clamping bushing</p>	<b>L100A</b>					●	●
<p>Ordering data:</p>	<p>Free shaft length or dimension from mounting surface to cover.</p>							

<sup>1</sup>The coding of the switch type may change as shown in Catalog 100, 120 and 130, page 4.

Optional Extras	Code	For Switch Sizes			
		S0	S1	S2	S3

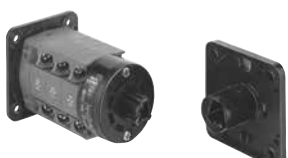

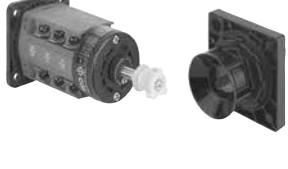

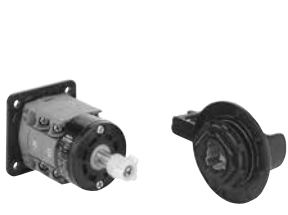

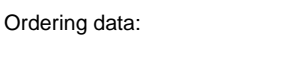

### Standard Door Clutch

	<p>With profile extension parts</p> <p>Front protection IP 40 Front protection IP 66/67</p>	<p><b>M280</b> <b>M280/.EF</b></p>	●	●	●
	<p>With shaft extension, shaft with unlimited adjustable length</p> <p>shaft fixation with set screw Front protection IP 40 Front protection IP 66/67</p> <p>shaft fixation with shear ring Front protection IP 40 Front protection IP 66/67</p>	<p><b>M280E</b> <b>M280E/.EF</b></p>	●●	●	●
	<p>Door clutches M700 ff.<sup>1</sup></p> <p>The M700 ff. is a padlock door clutch and a mechanical interlocking safety device. Using the device the electrical panel may be opened only when the switch is in the OFF position and no padlock is fitted. Note: Only in the ON position can knowledgeable personnel using a simple tool to defeat the interlock. The M700's flexibility allows for successful installation with as much as + or - 5 mm of misalignment between the shaft and door.</p> <p>Handle lockable with padlocks Protection IP 66</p> <p>The escutcheon plate is available in black, yellow and alu. The handle may be supplied in black and red.</p>	<p><b>M700/.</b></p>	●	●	●
	<p>Standard handle and standard escutcheon plate Protection IP 65</p>	<p><b>M701</b></p>	●	●	●
	<p>Unlock insert for the M700 ff.</p> <p>To open the door in ON-position. (After the locking has been made inactive, it is necessary to take effective precautions against an opening of the door by unauthorized persons.)</p>	<p><b>S1D M700 29</b></p>	●	●	●
	<p>Door clutches M800 ff.<sup>1</sup></p> <p>Door clutch utilizes a simple and robust design and features a compact size. It has an interlock in the ON-position while a padlock can be fitted in the OFF-position. The door clutch may be opened only if the switch is in the OFF-position. In special cases, however, authorized people have a requirement to open the door, even if the switch is in the ON-position. Further characteristics are the single hole mounting with IP 66/67 protection degree, as well as the Accepted Misalignment up to ± 3 mm horizontally and ± 5 mm vertically. Maximum 3 padlocks with a minimum shackle diameter from 5 up to 8 mm are possible.</p>	<p><b>M810/.</b> <b>M800/.</b></p>	●	●	●
<p>Ordering data:</p>	<p>Dimension from face of the switch to the cover or dimension from mounting surface to cover as well as the interlock program and the color selection.</p>				

<sup>1</sup>Additional shaft extension must be specified.

Optional Extras	Code	For Switch Sizes			
		S0	S1	S2	S3

### Simplified Door Clutch

	<p>The simplified door clutches are utilized primarily when the switch is mounted to the bottom of the enclosure and the handle and the escutcheon plate are mounted on the cover.</p> <p>With profile extension parts Front protection IP 40 Front protection IP 65</p>	<p><b>M290/A1</b> <b>M290/A1.EF</b></p>	<p>● ● ● ● ●</p>	<p>● ● ● ● ●</p>

<p><sup>1</sup>Additional colors on request.</p>						

<b>Optional Extras</b>	<b>Code</b>	For Switch Sizes			
		S00	S0	S1	S2

### Control and Indicator Device (without Lamp)

	<p>For 1 lamp with socket BA 9s Max. power 2,8 W</p> <p>The control and indicator device includes a single hole mounting 30 mm with locking nut and can be supplied with the following front end assemblies: Front ring (alternatively with add-on escutcheon plate), Escutcheon plate 48 x 48 mm (alternatively with add-on escutcheon plate) or escutcheon plate 64 x 64 mm.</p> <p>The operation may be as follows:</p> <p>Turn to operate</p> <p>Push-to-turn operation (interlock as control and alarm switch)</p> <p>This type of version is available with 1 or 2 auxiliary contacts. Select between a contact system with a rigid contact bridge for excellent AC-15 making and breaking capabilities which is also available with gold contacts for use in aggressive environments or a H-bridge design with "cross-wire" contact system with gold-plated contacts for low voltages and currents.</p>	<p><b>Q110</b></p> <p><b>Q110/F</b></p>	<p>●</p> <p>●</p>			
	<p>Removal aid for control and indicator device</p> <p>For 6 lamps with socket T6,8 Length of lamp 42-44 mm Max. power per lamp 2,5 W</p> <p>According to the operating voltage the lamps have to be paralleled or connected in series. As front end assembly the alu-escutcheon plate 51,8 x 51,8 mm is supplied.</p>					
Ordering data:	For size S0 the front end assembly, the quantity and operation of the auxiliary contacts and type of the contact system.					

### Control and Indicator Device with Light Conductor

	<p>The luminous source is a LED module with yellow light-emitting diode mounted at the end of the switch. The transmission of light occurs via a light conductor.</p> <p>Operating voltage 24 V AC/DC 60 V AC, 60 V DC 110 V AC, 110 V DC 230 V AC with test terminal 24 V DC 60 V DC 110 V DC</p> <p><u>Types of version</u> Without interlock (handle "turn to operate") With interlock (handle "push to turn") The control and indicator device is available for single hole mounting and mosaic.</p>	<p><b>Q100B</b></p>	<p>●</p>			
	Ordering data:					

<b>Optional Extras</b>	<b>Code</b>	For Switch Sizes			
		S0	S1	S2	S3

### Trip Indicator

 <p>With square escutcheon plate</p> <p>With rectangular escutcheon plate</p> <p>The trip indicator used on switches with spring return positions. It includes a colored indicator to show the last SR position that handle has been turned. Two possibilities for flag indicator exist: a) left red - right green b) left green - right red</p>	<p><b>M120/A</b></p> <p><b>M120/B</b></p>	●	●		
		●	●		
Ordering data:	The color to appear after left or right operation.				

### Position Indicator

 <p>The position indicator shows the location of the switch position, even when the panel door is open and the escutcheon plate is not visible.</p>	<b>M150</b>		●	●	●
---	-------------	--	---	---	---

### Auxiliary Contacts

 <p>These auxiliary contacts are controlled with a cam which can be programmed. The max. number of the auxiliary contacts for switches of size S1 and S2 is 4 pcs. and for switches of size S3 is 6 pcs.</p> <p>Select between a contact system with a rigid bridge for excellent AC-15 making and breaking capabilities or a H-bridge design with "cross-wire" contacts (sizes S1 and S2) for low voltages and currents. The contact systems with gold contacts or gold-plated contacts allow for use in aggressive environments also.</p> <p>In cases where more than 4 resp. 6 auxiliary contacts are required, an auxiliary switch should be used alternatively.</p>	<b>M510B</b>		A11	C80	
			A14	C125	
Ordering data:	Quantity and operation of the auxiliary contacts and type of the contact system.				

Optional Extras	Code	For Switch Sizes			
		S0	S1	S2	S3

### Push-pull Interlock

	<p>To pull lateral spring return</p> <p>To pull lateral latching</p> <p>To push lateral spring return</p> <p>To push lateral latching</p>	<p><b>V110A</b></p> <p><b>V115A</b></p> <p><b>V130A</b></p> <p><b>V135A</b></p>	<p>●</p> <p>●</p> <p>●</p> <p>●</p>			
	<p>The push-pull device is used to interlock the switch so that the handle can be rotated only when pushed or pulled. The push-pull device can be programmed to allow the interlock to operate only between pre-determined switch positions. Auxiliary contacts can be operated by means of the axial movement of the handle. For switches size S0 the max. number of auxiliary contacts is 2 pieces for all other sizes 8 pieces. In addition switches size S0 can also be combined with a trip indicator.</p>					
	<p>To pull lateral spring return</p> <p>To pull lateral latching</p> <p>To pull and to push lateral spring return</p> <p>To push lateral spring return</p> <p>To push lateral latching</p>	<p><b>V110</b></p> <p><b>V115</b></p> <p><b>V120</b></p> <p><b>V130</b></p> <p><b>V135</b></p>	<p>●</p> <p>●</p> <p>●</p> <p>●</p> <p>●</p>	<p>●</p> <p>●</p> <p>●</p> <p>●</p> <p>●</p>	<p>●</p> <p>●</p> <p>●</p> <p>●</p> <p>●</p>	
	<p>The push-pull device is used to interlock the switch so that the handle can be rotated only when pushed or pulled. The push-pull device can be programmed to allow the interlock to operate only between pre-determined switch positions. Auxiliary contacts can be operated by means of the axial movement of the handle. For switches size S0 the max. number of auxiliary contacts is 2 pieces for all other sizes 8 pieces. In addition switches size S0 can also be combined with a trip indicator.</p>					
Ordering data:	Description of the interlocking program, number and operation of the auxiliary contacts.					

### Stop and Go Device

	<p>The stop and go device prevents a fast switching thru the center OFF position. This is only possible with a 60° switching angle.</p> <p>The stop and go device only becomes activated in the center switch position, in either in both or one direction.</p>	<p><b>V160</b></p>	<p>●</p>			
	Ordering data:	Operation of the stop and go device.				

### Interlock between Switches

	<p>For 2 switch columns</p> <p>An interlock between 2 or 3 switch columns permits the operation of one switch only when the other switch or switches are located in a pre-determined switching position. For heavy duty service reinforced devices are available.</p>	<p><b>V600/B</b></p>	<p>●</p>	<p>●</p>	<p>●</p>	
	<p>For 3 switch columns</p>	<p><b>V600/C</b></p>	<p>●</p>	<p>●</p>	<p>●</p>	
Ordering data:	Description of the interlocking program.					

Optional Extras	Code	For Switch Sizes			
		S0	S1	S2	S3

### Push Button Interlock

	<p>With square escutcheon plate</p> <p>Switching only possible if push button is depressed.</p> <p>Switching only possible if push button has been depressed and released.</p> <p>Up to 4 auxiliary contacts can be operated by depressing the push button.</p>	<p><b>V400/A1</b></p> <p><b>V400/A2</b></p> <p><b>V400/B1</b></p> <p><b>V400/B2</b></p>	<p>●</p> <p>●<sup>1</sup></p> <p>●</p> <p>●</p>	<p>●</p> <p>●</p> <p>●</p> <p>●</p>	<p>●</p> <p>●</p> <p>●</p> <p>●</p>	<p>●</p> <p>●</p> <p>●</p> <p>●</p>	
	<p>With rectangular escutcheon plate</p> <p>Switching only possible if push button is depressed.</p> <p>Switching only possible if push button has been depressed and released.</p>						
	<p>Ordering data:</p>						<p>Number and operation of the auxiliary contacts.</p>

### Electromechanical Interlock<sup>2</sup>

	<p>For switches size S1</p> <p>The electromechanical interlock locks the switch in any switching position. The interlock device is operated by energizing or de-energizing the electromechanical system. Adding auxiliary contacts to the switch permits the device to be operated only in pre-determined positions.</p>	<p><b>V140</b></p>	<p>●</p> <p>●</p> <p>●</p>	<p>●</p> <p>●</p> <p>●</p>	<p>●</p> <p>●</p> <p>●</p>	<p>●</p> <p>●</p> <p>●</p>
	<p>For switches size S2 and S3 or for switches size S1 with DC solenoid</p>					
<p>Ordering data:</p>	<p>Advise if the interlock is activated either by energizing or de-energizing of the electrical system. Coil voltage also required.</p>					

Optional Extras	Code	For Switch Sizes				
		S00	S0	S1	S2	S3

### Protective Cover

 <p>The protective cover prevents accidental contact with current-carrying terminals.</p>	<b>M160</b>					
					C80 C125	C315 C316 L400

### Ground and Neutral Terminal

 <p>Ground terminal</p> <p>Neutral terminal</p> <p>Ground and neutral terminal</p>	<b>H040/E</b>	●				
	<b>H040/N</b>	●				
	<b>H040/NE</b>	●				

### Tandem Drive

 <p>For 2 switch columns</p> <p>Two or three switch columns can be operated simultaneously. Special programs are available to reinforce the device for heavyduty applications.</p>	<b>M300/B</b>			●	●	●
	<b>M300/C</b>			●	●	●

### Bayonet/Switch Coupling

 <p>The device is used to couple switches into one column</p> <p>Switches of the same size</p> <p>Switches of different sizes</p> <p>For use on rear of switch</p> <p>To add some optional extras</p>	<b>M270</b>			●	●	●
	<b>M275</b>	●	●	●	●	●
	<b>P100</b>			●	●	●

Optional Extras	Code	For Switch Sizes			
		S0	S1	S2	S3

### Special Drives

	<p><b>Heavy duty drive unit</b></p> <p>The device is designed to allow customer to couple his own operating device to the switch.</p>	<b>G800/A</b>	●					
	<p><b>Heavy duty drive unit with actuator and roller</b></p>		<b>G800/B</b>	●				
	<p><b>Double action lever</b></p> <p>Available in white and electro-gray.</p>			<b>G800/C</b>	●			
	<p><b>Rope operation</b></p> <p>Available for spring return, maintained or stepping operation.</p>				<b>G900/B</b>	●		

<b>Optional Extras</b>	<b>Code</b>	For Switch Sizes			
		S0	S1	S2	S3

### Spring Return over several Positions

	<p>Spring return from both sides</p>	<p><b>M470/A</b></p>	●●	●	●	
	<p>Spring return from one side</p> <p>Spring return for angular displacement up to 30° can be accomplished by using the latching mechanism only. If a large number of contacts must be opened simultaneously or a total angular displacement is larger than 30° over which the spring return is operational, the switch must use one of the spring return devices.</p> <p>Spring return from both sides can be designed to permit maintained position on each side of center.</p>		<p><b>M470</b></p>	●●	●	
<p>Ordering data:</p>	<p>For M470, specify spring return from either left or right side and details of maintained positions, if required.</p>					

### Uni-directional Interlock

	<p>The uni-directional interlock prevents the switch from being operated counterclockwise. The interlock may be in either all positions or in pre-determined positions only.</p>	<p><b>M400</b></p>	●	●	●	●
	<p>Ordering data:</p>		<p>Specify which positions should be interlocked.</p>			

### Slip Clutch and Ratchet Coupling

	<p>Slip clutch</p> <p>Using the slip clutch, two cam shafts can be coupled in such a way so that the secondary cam shaft will operate only after the primary cam shaft has been moved over a pre-determined angle. This slip clutch allows e. g. the de-energized changing back of switches for pole-changeable motors. Not available for D-switches.</p>	<p><b>M200</b></p>	●	●		
	<p>Ratchet coupling</p> <p>A ratchet coupling attaches to the rear of the switch. Additional stages are then attached behind the coupling device which serves to operate that portion of the switch only when the handle is turned counterclockwise. When the handle is turned clockwise, the rear switch portion remains in the same position.</p>		<p><b>M230</b></p>		CA40 CA50 CA63	

Optional Extras	Code	For Switch Sizes			
		S0	S1	S2	S3

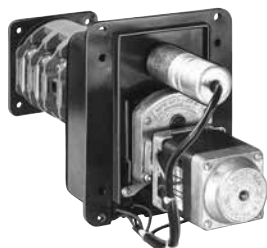

### Electromechanical Trip Device (Undervoltage Release)<sup>1</sup>

	<p>Operating voltage and frequency:</p> <p>AC/50 Hz</p> <p>AC/60 Hz</p> <p>AC/50/60 Hz</p> <p>DC</p> <p>The device includes a magnetic system which releases the switch to the trip position at voltage failure or undervoltage of 70 % of the nominal voltage. The device is trip-free, in that the switch can be operated only when the primary voltage is available. When using DC voltage, an economy resistor must be provided.</p> <p>Switches with integrated undervoltage release are described on page 21.</p>	<p><b>V350/A</b></p> <p><b>V350/B</b></p> <p><b>V350/C</b></p> <p><b>V350/D</b></p>	<p>●</p> <p>●</p> <p>●</p> <p>●</p>			
	<p>Ordering data:</p> <p>Operating voltage and frequency for the magnetic system.</p>					

### Electromechanical Trip Device (Shunt-trip)<sup>1</sup>

	<p>The device permits the switch to be turned to the trip position by remote control. The coil is designed for short-time duty requiring an auxiliary contact in the switch which de-energizes the coil in the trip position.</p> <p>Controlling of the magnetic system: 24 V-440 V/50 Hz, 60 Hz or DC</p>	<p><b>V360/A</b></p>	<p>●</p>			
	<p>Ordering data:</p> <p>Operating voltage for the magnetic system.</p>					

### Motor Drive<sup>1</sup>

	<p>The motor drive consists of an AC motor with condenser, gear train and Geneva gear. This device allows switches to be operated from a remote location. Motor voltages available are 220 V, 50 Hz and 117 V, 60 Hz. A technical data sheet pertaining to the possible control systems is available upon request.</p>	<p><b>R300</b></p>	<p>●</p> <p>●</p> <p>●</p>			
--	--	--------------------	----------------------------	--	--	--

<sup>1</sup>Ambient temperature: 35 °C during 24 hours with peaks up to 40 °C.

### Key-lock Device with Kaba Lock

	<p>For single hole mounting 40 mm</p> <p>Escutcheon plate 64 x 64 mm (mounting EL2) With front ring (mounting EL1)</p> <p>Key can only be removed in the 12 o'clock position. Central locking systems are available.</p>	<p><b>V750/A1</b></p>	●	●		

### Key-lock Device with Half-cylinder Lock

	<p>For switches with plaster depth trim</p> <p>For 1 stage switches in standard flush mounting box For multiple staged switches in special flush mounting box Protection IP 42</p> <p>The switch must have an arrested position in 12 o'clock. The key is only removable in the 12 o'clock position. The max. angular displacement is 2 x 135°.</p>	<p><b>V755.UE1</b></p>	BA20			
	<p>Dust cap for key-lock device Protection IP 43</p>	<p><b>S0D V755 12</b></p>				
	<p>For panel mounting</p> <p>The key is removable in the 12 o'clock position. The max. angular displacement is 2 x 120°. Protection IP 42 Additional programs with key removable in 2 positions are available on request.</p>	<p><b>V755.E</b></p>	●			

Optional Extras	Code	For Switch Sizes			
		S0	S1	S2	S3

### Key Handle Device

	For four hole panel mounting and switches in enclosure	<b>V900</b>	●	●		
	Device					
	Handle		<b>V901</b>	●	●	
Key						
	<p>The device is designed similar to a cylinder lock. It can be programmed to remove the key or the handle only in one, in all or in pre-determined positions. A central lock system is available.</p> <p>Use of the device with switches in PN enclosure is possible only for switches type CA11B and CA20B with up to two stages.</p>	<b>V902</b>	●	●		
Ordering data:	Handle or key as operator. Advise position in which the operator is to be removed.					

### Safety Key-lock Device with separate Drive

	For switches in enclosure	<b>V790</b>		●		
	<p>Various key positions and locking programs are available. The key may be removed in locked and non-locked positions or in locked positions only. The different locking programs permit locking in one, all or in pre-determined switch positions.</p>					
Ordering data:	Advise locking program and positions in which the key can be removed.					

<b>Optional Extras</b>	<b>Code</b>	For Switch Sizes			
		S0	S1	S2	S3

**Safety-key-lock Device with separate Drive**

	With small cylinder lock	<b>V760/A.E</b>	● ●	●			
	Square escutcheon plate		<b>V760/B.E</b>	● ●	●		
	Rectangular escutcheon plate						
		With commercial half-cylinder lock	<b>V760/A</b>	●	●	●	●
Square escutcheon plate		<b>V760/B</b>	●	●			
	With half-cylinder lock	<b>V765</b>		●			
	Square escutcheon plate						
	With dust cap						
	Protection IP 43						

Various key positions and locking programs are available.  
Key positions:  
Key can be removed in locked and unlocked positions.  
Key can be removed only in locked positions.  
Locking programs:

Locking Program No.	Switching Angle	Switch Positions		Size
		To be locked	Not to be locked	
1	30°-90°	one	the balance	S0-S3
2	20°	all	none	S1, S3
	30°-90°			S0-S3
3	30°-90°	the balance	one	S1-S3
4 <sup>1</sup>	30°-90°	one <sup>1</sup>	the balance <sup>1</sup>	S0-S3

<sup>1</sup>Locking program 4 permits the locking of the device in any switch position. However, the actual locking becomes effective in a pre-determined switch position only.

Ordering data: Advise locking program and positions in which the key can be removed.

Switch Type Variations	Suffix Code	For Switch Sizes			
		S0	S1	S2	S3

### PFR (Power Failure Release)<sup>1</sup>

	<p><b>Size S0</b></p> <p>The magnetic system includes a low hum DC coil with incapsulated diode rectifier (blocking voltage 1000 V) = it, therefore, works independent of frequency. PFR switches are available with 24 V-600 V coils.</p> <p>Available switching detents: 1 x 60° (60° to the right of center OFF), 2 x 60° (60° to the right and left of center OFF), 1 x 60° + 30° (60° plus an additional 30° to the right of OFF).</p>	<b>X</b>	CA10- CA20 CH10			
	<p><b>Alternatively with trip-free release</b> (Switching angle 1 x 60°)</p> <p>The PFR switch series is designed to provide protection for both machines and machine operators by preventing the equipment (which has been operating) from restarting automatically after a power failure.</p> <p>The device includes a magnetic system which releases the switch (by means of a linear spring return mechanism) to the trip position at voltage failure or undervoltage of 70 % of the nominal voltage.</p> <p><b>Size S1</b></p> <p>Operating voltage for the magnetic system: 24 V-500 V/50 Hz 24 V-600 V/60 Hz</p> <p>(Switching angle 1 x 60°)</p>		<b>Y</b>	CA10- CA20		
Ordering data:	Operating voltage for size S0 as well operating voltage and frequency for size S1 for the magnetic system.	<b>X</b>	A11 A14 CA40 <sup>2</sup> CA50 <sup>2</sup> CA63 <sup>2</sup>			

### Lockout-relay<sup>1</sup>

	<p><b>With manual release</b></p> <p>The lockout-relay is typically used to remotely switch electrical circuits from one power source to another.</p> <p>The device contains a totally incapsulated coil and linear spring return mechanism which is compressed by manually turning the handle to the ON position (60° to the right of OFF). Once in the ON position, the handle is mechanically locked in place and cannot be manually turned back to OFF. When the coil is energized, however, the unit will automatically spring return to the OFF position.</p> <p>A second version is available with push button manual release for test purposes.</p> <p>Controlling of the magnetic system: 24 V-500 V/50 Hz 24 V-600 V/60 Hz 24 V-125 V DC (magnetic system for voltages above 125 V DC on request)</p>	<b>M</b>	CA10 CG8 CH10- CHR16	A11 A14 CA40 <sup>2</sup> CA50 <sup>2</sup> CA63 <sup>2</sup>		
	<p><b>Without manual release</b></p>		<b>L</b>

# Enclosures

## Code

For Switch Sizes

S0 | S1 | S2 | S3

### Standard Enclosures

Plastic Enclosures  
Protection IP 54

With low cover

**ST1 N100**

CA40  
CA50  
CA63

With high cover

**ST1 N200**

CA40 C80  
CA50 C125  
CA63

Enclosures are available with the following conduit entries which are arranged in top and bottom:

Code	Type of conduit entry
D	2 x PG29 + 1 x PG11
E	2 x PG21 + 1 x PG11
F	2 x PG16 + 1 x PG11
M	2 x 1" NPT
N	2 x 3/4" NPT
P	2 x 1/2" NPT
U	2 x ISO M20
V	2 x ISO M25
W	2 x 1" BSI

Any one of a variety of switches with different amperage ratings and numbers of stages can be installed in the same type of enclosure. Different kits are, therefore, required to accomplish this.

Kits:

Switch type	No. of stages	Enclosures
CA40, CA50, CA63	1	ST1 N100
CA40, CA50, CA63	2	ST1 N200
CA40, CA50, CA63	3	ST1 N200
CA40, CA50, CA63	4	ST1 N200
C80	1 and 2	ST1 N200
C125	1	ST1 N200

**ST1 A013A**  
**ST1 A013B**  
**ST1 A013A**  
**ST1 A013D**  
**ST1 A011B**  
**ST1 A011A**

Ordering data:

Code for the type of conduit entries required.

# The Range of “Blue Line” Switchgear

Technical literature covering the following products is available on request.

	<b>Catalog Number</b>
<b>Main Switches and Main Switches with Emergency Function 16 A-315 A Maintenance Switches 20 A-315 A Switch Disconnectors 20 A-315 A</b> According to IEC 60947-3, EN 60947-3, VDE 0660 part 107, IEC 60204, EN 60204 and VDE 0113	<b>500</b>
<b>C, CA and CAD Switches 10 A-315 A and L Switches 350 A-2400 A</b> C, CA and CAD switches are designed for universal application. They are recommended for instrument, isolator, double-throw and motor control. L switches are designed for load and off-load applications. They are used to switch resistive or low inductive loads.	<b>100</b>
<b>Optional Extras and Enclosures</b> The complete product line, a large number of optional extras is available, including door interlocks, push-pull devices, cylinder and padlock attachments, control and indicator devices, AC motor drives, as well as enclosures, both insulated and metal.	<b>101</b>
<b>A and AD Switches 6 A-25 A</b> A and AD switches have 4 contacts in each switching stage. These switches provide an extensive range of switch functions and require a minimum mounting depth. Up to 24 switching positions are possible, with availability of 48 contacts per 12 stage switch column.	<b>110</b>
<b>CG, CH and CHR Switches 10 A-25 A</b> Ultra compact CG, CH and CHR switches are ideally suited for control and instrumentation applications. Switch terminals are “finger-proof” and conveniently accessible for wiring and are delivered open. All CG4 switches offer specially designed gold plated contacts or H-bridges with “cross-wire” contact systems, which facilitates their use in electronic circuitry and chemically aggressive environments.	<b>120</b>
<b>DH, DHR, DK and DKR Switches 6 A-16 A</b> DH, DHR, DK and DKR switches incorporate unique corrosion resistant contacts that permit operation on system voltage as low as 1 V. They have fully enclosed and protected contacts which can be operated either by rotary and/or lateral handle movement. D switches are used in calibration and semiconductor circuits. They are also used for relay and contactor control.	<b>130</b>
<b>X Switches 200 A-630 A</b> X switches can be applied for load, tap and gang switching duties. They incorporate 6 contacts in each switching stage. Their compact design provides a minimum length dimension for mounting purposes.	<b>140</b>
<b>KG Switches 20 A-315 A and KH and KHR Switches 16 A-80 A</b> KG, KH and KHR switches are excellent circuit interruptors. They have high through fault and fault making capacities and are especially designed for use as isolators and safety switches for machine tools, distribution panels and switchboards. KG ON/OFF switches offer unusually high dimensioned air and creepage distances between terminals which are designed for time saving “straight-line” wiring. ON/OFF switches are available with up to 8 poles and double-throw switches are available with up to 4 poles.	<b>150</b>
<b>Push Buttons and Pilot Lights, 22,5 mm Ø</b> A complete range of state-of-the-art push buttons and pilot lights represent an ideal combination of functional security and economical efficiency in a modular design.	<b>302</b>
