

Shaping the future

with **technology** you can rely on
and **support** you can trust

 **Perkins**[®]

THE HEART OF EVERY GREAT MACHINE

You can always count on us

Wherever you are in the world –
wherever a city is being transformed,
the land cultivated or lives improved
– you will find a Perkins engine.

“Unrivalled customer service is
as important to us as the quality
of our engines. That’s why,
wherever you are in the world,
you’re always local to Perkins.”

Gwenne Henricks, President

Built on 80 years of engineering expertise, every Perkins power solution is designed to improve your performance and productivity. We have poured our passion, innovation and engineering excellence into more than 20 million engines – over half of which are still powering the world, and our customers, today.

You can expect world-class quality not just from our engines, but also from our talented teams. Every day we are building stronger, closer relationships with businesses just like yours, using our insight and experience to tailor engines specifically for you.

Because we are part of the global Caterpillar family you can count on us to deliver every time. Investment in class-leading technology and processes, along with the local expertise of a worldwide distribution network, means we are supporting businesses in thousands of communities – including yours.

By continually raising standards and providing unbeatable products and service, we are committed to exceeding your expectations again and again.

Welcome to Perkins.

Delivering power you can depend on

We live the values of integrity, excellence, teamwork and commitment to deliver world-class power solutions to you.

Your needs are our number one priority, which is why we provide more tailored technology for original equipment manufacturers than anyone else. Whatever your application, you can benefit from durable, high-performance engines ranging from 4-2000 kW (5-2800 hp) and which meet all worldwide emissions legislation.

You can choose your perfect power solution from an extensive range of diesel and gas engines that currently drive more than 5,000 different applications for over a thousand customers in construction, agriculture, materials handling and power generation. From the ultra-compact 400 Series right through to the incredibly powerful 4000 Series, your Perkins engine will transform your machines' performance and your business.

Best of all, your engine can be tailored specifically for you, making installation and servicing easy, quick and cost effective.

Ultimately, you count on us to deliver, which is why we invest heavily in innovative business, design and manufacturing processes at our global facilities. With large manufacturing plants in the UK, US, Brazil, China and India, together producing up to 800,000 engines a year, we make it easy for you to access dependable power solutions wherever you are in the world.

Of course, the biggest investment we make is in our people. Our passionate, world-class teams live the values of our company, thriving in an inclusive culture that fosters innovation, invention and talent development. In turn, this ensures we always go the extra distance to bring you unparalleled product quality and service.

You can always rely on our engines, thanks to the Perkins quality programme which ensures every one of us is responsible for maintaining the very highest standards. Raising the bar even higher, our Continuous Product Improvement process means our latest models are also our best performing.

We want you to have the highest quality engine for the lowest possible cost of ownership, which is why we are constantly improving efficiencies, driving down waste and applying lean manufacturing and logistics principles.

You can always depend on Perkins – not just today but for a lifetime. We are committed to our customers and building long-lasting partnerships, with expert support teams throughout the world keeping your engines running, wherever they are.

Support starts even before an order is made – it begins by understanding your needs. One way we can do this is through one of our Technology Integration Workshops. This is an inspiring forum for customer collaboration, where our experts help you select the best engine and tailor our technology for your machines. This valuable process significantly reduces development time and costs, ensuring you get maximum return on investment.

Even before your engines get to work you will find support from our international network of local, highly trained distributors. Operating from thousands of outlets in more than 180 countries, they will keep your engine at peak performance using a sophisticated range of web tools and diagnostic technology.

For your peace of mind, we offer one-year warranties on all our constant-speed engines and two-year warranties on variable speed models as standard. These are supported by multilevel Extended Service Contracts which can be bought additionally and are tailored to suit your needs, offering extra reassurance and total protection against unexpected repair costs.

Enjoy a lifetime of support

We go the extra distance to bring you unrivalled service. That's why our UK and Singapore parts distribution centres operate around the clock, guaranteeing direct delivery of genuine Perkins parts wherever you are in the world.

To make sure you always benefit from unbeatable expertise and friendly service, we continually sharpen our distributors' skills and know-how through our Training Guild programme, which is delivered by more than 60 trainers at seven global regional training centres.

Doing the right thing

Like you, we recognise the impact we have on the planet and the obligation we have to improve it. Whether it's ensuring the welfare of our employees, protecting the environment or supporting local communities, Perkins is striving for a better world.

The health, safety and welfare of our people is paramount and an integral part of our culture. We are already way ahead of our stringent targets, but will not rest in our mission to achieve zero incidents, permanently.

As our products become more efficient to meet worldwide legislation and your needs, so do our production processes. Our sustainable development strategy promotes the reduction of carbon emissions, waste and water consumption, while improving efficiency and supporting local, sustainable communities.

Even as our company grows and demand increases, by 2020 we pledge to:

- reduce greenhouse gas emissions by 25%
- increase energy efficiency by 25%
- obtain 20% of our energy from renewable sources
- send no waste to landfill

Improvements on 2006 figures.

Key to our community work is a focus on making a real difference through education, charitable giving and the environment. Among our activities, we currently support wildlife trusts in the UK, underprivileged children in Brazil, a technical school in the US and heart operations for children in China.
