HEC LED Driver

COMPANY PROFILE

Founded in 1979, HEC Group is today a leading global manufacturer and designer of LED drivers, Power Supplies, PC case, serving customers around the world.

In addition to our headquarters in Taiwan, HEC Group has a manufacturing facility in China and an established network of branch offices in USA, Germany, UK, Japan, Korea and China. This combination enables us to provide our customers with competitive manufacturing costs and the most efficient and immediate service worldwide.

Our world class engineering and design expertise, help us with delivering total solution to the first-tier system integrators. Today, our R&D groups continue to evolve and refine our technologies, constantly improve performance levels, and simultaneously reduce manufacturing costs.

Innovative products, combined with dedication to customers and the consistent delivery of high-quality products, are the foundation for HEC's growth and leadership in today's highly competitive LED lighting market.

HEC delivers LED Drivers, LED Luminaires, switching power supplies, open frame power supplies. We have also developed our own line of switching power supplies for the retail market.

Today the "HEC" brand is recognized as a world-class brand among OEM customers, system integrators, industrial users and retail customers.

HEC LED Driver

COMPREHENSIVE SOLUTION FOR LED APPLICATIONS

- From 3W to 150W of constant current mode or constant voltage mode
- Wide range of AC input, 90Vac - 305Vac
- With up to IP67 of dustproof and water-proof level
- Various dimming function including PWM signal, 1-10Vdc, resistance, DALI, Triac and IR
- OVP, SCP, OTP, OCP, OPP protection design, and compliant with variety of safety regulations (TUV, UL, ENEC, KEMA, CQC, and PSE)

ABILITY OF CUSTOMIZATION DESIGN FOR SPECIFIC REQUIREMENT

- Meet independent type requirement
- Compact 44mm(L) x 41mm(W), and round shape LED drivers to fit limited LED Luminaire space
- Fan monitor circuit design to protect LED Luminaire from thermal damage
- Multi-output design from 1 to 4 channels

HIGH RELIABILITY AND SUPERIOR PERFORMANCE

- Measured MTBF > 43,000hrs at 50°C ambient, and operating under a temperature of at -30°C to +60°C
- High efficiency (up to 93%), high PF value (>0.95)
- Low Ripple/Noise (< 1%), and low THD (<15%)

DALI

DALI

DALI is an acronym and standard for "Digital Addressable Lighting Interface". It's an international standard that guarantees the exchangeability of dimmable electronic control gears (ECG) from different manufacturer. This gives planners, luminaire manufacturers, building owners, installers and end-users the security of supply from many sources.

Feature :

Simple and flexible installation

Parallel wiring of the control groups is not required. New components can be added everywhere within the system whenever an existing illumination system need s to be enlarged.

Non-polarized

There is no polarity (+,-) of DALI control line.

Logarithmic dimming curve

Matching the eye's sensitivity.

Stable dimming function

All the luminaires receive the same interference-free digital signal and therefore the same dimmer value.

Status feedback

e.g. ON/OFF, actual brightness of the connected lamps, lamp state etc.

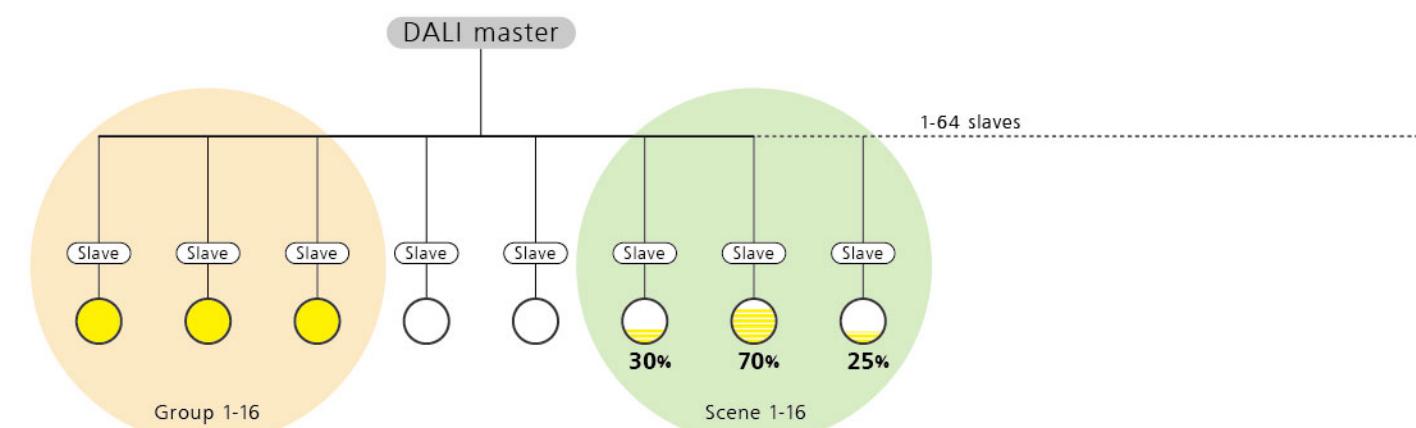

Cable lengths up to 300m

The maximum lead length between two connected systems must not exceed 300m, and a voltage drop of 2V must not be exceeded.

Maximum system current

The central interface power supply has been set to allow a maximum current input of 250 mA.

- A maximum of 64 slaves (Individual addresses)
- A maximum of 16 groups (Group addresses)
- A maximum of 16 scenes (Scenes light values)

HEC-60LTB-P

HEC-40LTB-P

Features

- Independent Type LED Driver
- AC Input : 220-277Vdc or 100-120Vac
- Switchable output current from 350mA to 2100mA
- Screwless cable connector design for fast assembly
- 1-10Vdc dimming function
- Isolation Class II (without grounding)
- Protection : OPP/OVP/OTP/SCP
- Optimum size for most of luminaire indoor application

Features

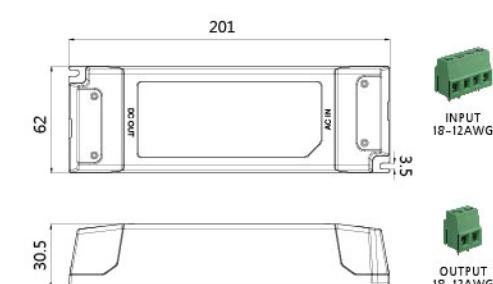

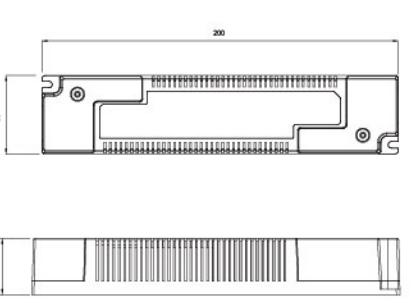

- Independent Type LED Driver
- AC Phase-cut dimming work with leading edge and trailing edge TRIAC dimmers
- Class 2 Power Supply
- Isolation Class II (Without grounding)
- Protection : OPP/OVP/SCP
- PF>0.9
- Fully isolated plastic case with IP20
- Approved with complete standard for safety and EMC

HEC-30/35/45/55
/70LTA-T Series**Features**

- Up to 4 output channels
- 3 IN 1 dimming function (1-10Vdc, PWM signal, or resistance)
- Independent Type LED Driver
- Class 2 Power Supply
- Isolation Class II (Without grounding)
- Protection : OPP/OVP/SCP
- PF>0.92
- Fully isolated metal case
- Universal AC input : Up to 305Vac
- Approved with complete standard for safety and EMC

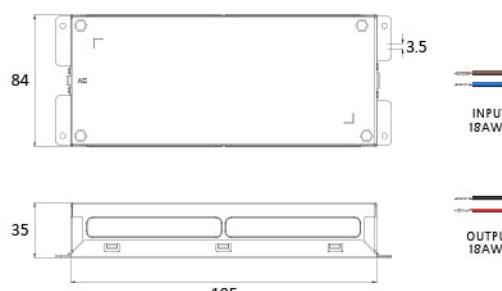

AC input operation voltage range	90~305Vac			
MTBF	>43,000hrs @50°C			
Operating temperature	-40°C~60°C (refer to output derating curve)

LTN-PF

Build-in Auxiliary Fan Output
Non-dimmable

HEC-45/50LTN-PF Series

Features

- Build-in 12V auxiliary fan output
- Independent Type LED Driver
- Class 2 Power Supply
- Isolation Class II(Without grounding)
- Protection : OPP/OVP/SCP
- PF>0.92
- Fully isolated plastic case
- Universal AC input : Up to 305Vac
- Approved with complete standard for safety and EMC

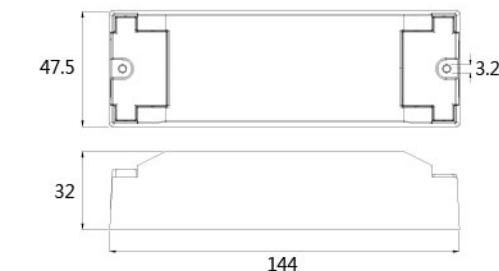

AC input operation voltage range	(F)=90~264Vac , (A)=90~305Vac

HEC-400LVN-48TEAA

Features

- Up to 12 output channels
- Easy-installation with standard Cat5 cable and RJ45 connector.
- 100ft Cat5 of max cable Length
- Protection : OPP/OVP/OVP/SCP
- PF>0.9
- IP20 design for indoor use.
- THD<20%
- 6 levels of OPP switching function
