▶▶ INNOVATIVE AND PRACTICAL SOLUTIONS

Comfort, Aesthetic and Performance with E-Line Smart Series.

► **ELEGANT AND PRACTICAL SOLUTIONS FOR BUSINESS CENTERS, OFFICES AND WORKING SPACES**

- Off-the-shelf products ready for use and equipped with power (mains/ ups), data, telephone and multimedia sockets for desk jobs, meetings and presentations.
- Ergonomic and flexible design that can be fitted with modular type energy, weak current and multimedia sockets based on your personal needs and choices.

► **ANODIZED COATED ALUMINIUM BODY**

- Colour options include anodized coating, white and black.
- Rich visual and functional options based on your personal needs and choices.

Needs and Expectations  
In Your Business Life

#### ► FUNCTIONAL AND FLEXIBLE DESIGN

- Structure and flexibility that can be managed in line with needs and demands.
- A wide range of cable entries and termination ends.
- Cable entries with blasting; bushed or screwless interlocking socket type.
- Structure ready for use thanks to interior connection structure and cabled and screwless connector/electric terminal.

#### ► INDISPENSABLE COMMUNICATION NEEDS

- Structural and accessorial options in harmony with the work environment.
- Aesthetic and high performance body structure.

FULL SAFETY BACKED BY INNOVATIVE AND AESTHETIC DESIGN AT ANY POINT OF LIFE

► **INNOVATIVE, TECHNOLOGICAL AND ARTISTIC STRUCTURE**

- May be embedded into the desk or working surfaces.
- A product variety backed by fixing holder without any worry for aesthetic look.

► **AESTHETIC AND FULLY SAFE STRUCTURE IN ONE UNIT**

- Product options equipped with Miniature Circuit Breaker with Switch or Residual Current Circuit Breaker with Over Current Protection along with exclusively designed box (optional).
- Raw material used in all plastic parts in our products is polycarbonate (PC) and is halogen free and is within V0 flame retardant class according to UL 94 standard.

A RICH VARIETY IN OFFICE ENVIRONMENTS  
AN INTEGRATED HARMONY

# ELINESMART SM-STD I

## STANDARD FREE TYPE

- This is a modular type office block with 45°angled sockets needed for work environments; it may be fixed by a screw if necessary, and it has a rectangular prism structure for use on desks and/ or over the plaster on walls.
- Upon request, it may be equipped with 2-module miniature circuit breaker with switch or Residual Current Circuit Breaker with Over Current Protection.
- Please specify the cover type. Our standard products are manufactured with “BLASTING TYPE” covers. Please call us if you ask “SNAP-ON CONNECTOR” and “BUSHED” types.
- Please select product(s) that are likely to meet your needs on the relevant page for standard products.
- For your requests for products equipped with socket options other than standard products, you can determine such strong current, weak current and multimedia sockets at your option from the “Socket Modules” page.

### CABLE ENTRY COVERS :

(1)  
Blasting Type  
Ø7 Hole (6 Quantity)  
Ø12 Hole (2 Quantity)

(2)  
Screwless Type With  
Snap-On Connector  
Ø7 Hole (4 Quantity)

(3)  
Double-Bushed Type  
M16x1,5 Hole  
(2 Quantity)

(4)  
Single-Bushed Type 1  
M20 x 1,5 Hole (1 Quantity)  
Ø7 Hole (4 Quantity)

(5)  
Single-Bushed Type 2  
M16 x 1,5 Hole (1 Quantity)  
Ø7 Hole (4 Quantity)

- Please specify the cover type. Standard type products are manufactured with “Blasting Type” covers.
- Please call us for other cover types.

### EQUIPMENT TABLE FOR STANDART PRODUCTS

### DESCRIPTIONS

- 1- Power sockets are NE-AD brand. Please contact us for different brands.
- 2- In standard products data (CAT-6, UTP, RJ45) and telephone (Cat-3, RJ11) sockets are not included and these are only provided as "Face Plate".
- 3- Upon request, active and passive network products are ICS brand. Please contact us for different brands.
- 4- Prices include installation, internal cabling (for power sockets) and blasting type plastic side covers and the cable is 1,5 mm H07Z1-K. Please contact us for different cross-sections and types.
- 5- Products are packaged nylon bags and cardboard boxes.
- 6- Products are under our 2 (two) year warranty against installation defects.
- 7- Our manufacture line also includes special products with any content and size based on your choices in addition to listed standard products.
- 8- In a capacity (module) definition, the first number refers to sockets while the second number refers to aluminium casing.

	1	Luxury Model Faceplate, Spring Cover, 22,5x45 mm, Transparent Protected Label Place, White	<b>1004186</b>
	1	Blind Plastic Cover, 22.5x45, White	<b>1004246</b>
	2	Blind Plastic Cover, 45x45, White	<b>1002612</b>
	1	USM Faceplate, 22,5x45 mm, White and Black	<b>1016320</b>
	1	HDMI Faceplate, 22,5x45 mm, White and Black	<b>1016321</b>
	1	VGA Faceplate, 22,5x45 mm, White and Black	<b>1016322</b>

- Unless otherwise is stated, in standard products, power sockets are NE-AD and/ or ERNA brands and USB Charge Adapted is ICS brand.
- Please call us for different codes.

## FITTED OFFICE SOCKET BLOCKS

- 1- The body is made of aluminium material and is painted with anodic or electrostatic powder paint system in white and black as colour alternatives.
- 2- Side plastic covers are manufactured of polycarbonate (PC) and meets “halogen free” and glow wire test conditions according to IEC 60965 and they are in “V0” flame retardant proof class according to UI94.
- 3- Free type standard products may be mounted to the desk by means of appropriate feet available on them if necessary.
- 4- Free type standard products may be screwed inside and/ or under the desk through screw holes on the side covers if necessary.
- 5- Covers of built-in products are opened/ closed mechanical (push open- push close) system and covers may be opened up to 90° in maximum in order to prevent breakage. Cable inlets and outlets of cover are of brush type and brushes are made of PA6 materials. The design allows covers to close easily regardless of whatever plug or adapter is connected to the socket; and when the cover is in closed position, the product will be at a maximum height of 2 mm to the desk surface.
- 6- Cylindrical type products have a body with “push-open” system and a brake system so that the product will not drop off to the ground when it is wide open. It is designed in a manner that when plugs are connected, it may go back to its nest inside the desk thanks to its elevator mechanism and spring cover structure so that only cable will remain and appear on the desk.
- 7- Standard products that can be mounted to the desk are positioned at a specific angle for easy use; and there is a moveable blanketing plate in harmony with the body at the back of the product which protects cable inlets and outlets.
- 8- Inside the product and in a separate chamber, there is a connector (electric terminal) connection apparatus and an interlocking, screw free connection for each conductor. Moreover, this connector tolerates and bears the traction and tensile loads of cables thank to a cable tightening clips fixed on it.
- 9- Connection of power sockets mounted to the product is via H07Z1-K with a cross section of 2.5mm or, upon request, 1.5mm cross-section. It is equipped with such connectors separately for UPS and Network circuits which can bear at least 16A load and connected by means of screwed and interlocking type..
- 10- Grounding contact screw and grounding connector fixed to the product's aluminium body is cabled with H07Z1-K cable with a cross section of 2.5mm to ensure body protection.
- 11- Socket mounting part is integrated to the body and every brand and universal and modular type is designed compatible with the installation of power sockets with a size of 45x45mm (2 module) and weak current and multimedia socket at a size of 45x22.5mm (1 module).
- 12- Mains and UPS sockets are 250V AC and 16A with 45° angle and spiked characteristicb “White” grounding sockets of German standard are used in mains circuit while “red” grounding sockets of French standard are used in UPS circuit. Phase-neutral-ground bridges of double, triple and quadruple socket systems are secured in themselves by means of brass bar
- 13- For data cable connections, spring cover and label window “face plate” is used that is compatible with Cat-6 UTP “keystone jack” structure.
- 14- For telephone cable connections, spring cover and label window “face plate” is used that is compatible with Cat-3 “keystone jack” structure.
- 15- Socket mounting part is also compatible with the mounting/ installation of all standard and modular (45x45 mm and/ or 45x22.5mm) USB charging units, USB adapter, VGA adapter, HDMI adapter etc and they can be used together with all brands.
- 16- 45x22.5mm (1 module) size blind covers compatible with the body are used between different strong and weak current sockets and after the last socket but before the termination cover
- 17- For cable outputs on the desk, cable organized and protective plastic backbone Conduits with flexible structure and “halogen free” are used.
