NEW: ESYLUX CORE PORTFOLIO WITH SHORT DELIVERY TIMES

For all products of our core portfolio, particularly short delivery times apply. In order to provide our customers with targeted access to these, associated products are marked accordingly in the catalogue. You can find out the exact delivery times by clicking on an icon on each item in the product section of the ESYLUX website.

- Extensive multi-sensor elements for intelligent light and HVAC control
- Visual or acoustic warning for demand-driven ventilation

Thanks to its unique multi-sensor elements, the ATMO KNX presence detector ensures not only an optimal level of brightness, but also a healthy and productive ambient climate in the room. With a total of six sensors in just one device, there is no need for several individual solutions. This shows just how easy it is to accommodate complex requirements using intelligent technology.

ATMO

MULTI-SENSORICALLY OPTIMISING THE ROOM CLIMATE

Comprehensive multi-sensor system for intelligent light and HVAC control

Demand-driven light switching or automatic light control at a constant brightness level depending on presence and daylight (constant light control)

Measurement of the ambient temperature as heat reflection of surfaces in the room (furniture, floors, walls); facilitates a constant temperature level regardless of short-term changes (e.g. temporary ventilation, open door etc.)

Variants with additional measurement of relative humidity for dew point calculation (e.g. to prevent mould growth in rarely used rooms)

Variant with additional measurement of VOCs (volatile organic compounds) for optimal control of the air quality; alternatively to automatic control, a visual or acoustic warning can be issued if a limit value is exceeded (for manual ventilation in line with demand)

Built-in acoustic sensor system to support PIR sensor systems in complex and angular rooms

Simple adjustment of the range and field of detection due to the lens cover, which can be cut to size

PRODUCT TYPES

FIELD OF DETECTION

DETECTION RANGE

	Ceiling 8 m
■ Diagonally (A)	∅ 8 m
■ Frontal (B)	∅ 6 m
■ Presence area (C)	∅ 4 m

- Offers numerous variants for multi-channel light and HVAC control
- One design for all applications within a building
- Two-piece housing for simple installation

The Compact presence and motion detectors have successfully built themselves a reputation among our range of sensors as traditional favourites and true all-rounders. Their robust design and high level of performance are just as impressive as their huge versatility in terms of applications: Whether ceiling or wall detector, whether 230 V, KNX, DALI or DALI-2, whether switching, dimming or HVAC, they ensure a perfect combination of convenience and energy efficiency at all times — and offer an innovative solution with touch-sensitive lens surfaces due to the touch detectors.

Parameterizable with ESY-Pen and ESY-App. More on pages xx - xx and at: esylux.asia/esy-pen.

COMPACT INNOVATION VARIETY FOR INDIVIDUAL CONTROL

Two-part housing with sensor head and power box for quick and easy installation

Variants for recessed, surface and flush mounting on ceilings available

Demand-driven switching of light (230 V) or automatic light control (1 - 10 V, 12 - 36 V, DALI or KNX) at a constant brightness level depending on presence and daylight (constant light control)

Various setting options (DIP, remote control or adjustment control), e.g. fully/semi-automatic, light values, switch-off delay times and button functions

Optimised for the control of LED lights via high-performance relay with tungsten pre-contact (230 V)

Integrated toggle provides the option of setting with remote control or adjustment control (to prevent operating errors and provide tamper protection)

Switching delay to avoid incorrect switching due to temporary, e.g. weather-related brightness variations

Manual override with staircase lighting function for detectors with push button input

Orientation light function for detectors with 1 - 10 V, DALI, DALI-2 or KNX

Wall-mounted variants compatible with common brands of switch series for a harmonious look

- Particularly small design for unobtrusive operation

When it is really important not to mar the aesthetic design of a room with technical elements, the mini presence and motion detectors are the perfect solution. Their tiny housings and extremely low installation heights mean that they retreat unobtrusively into the background, while nevertheless keeping a close eye on everything thanks to their high-quality sensor technology. They are available for all common operating technologies and consistently impress clients due to the ease of use.

Parameterizable with ESY-Pen and ESY-App.

COMPACT MINI QUALITY SENSOR SYSTEM IN THE SMALLEST FORMAT

Extremely compact design with diameters of just 25 mm (Ø 6-m detection range) to 58 mm (Ø 12-m detection range)

Demand-driven switching of lighting (230 V) or automatic light control (1 - 10 V, 12 - 36 V, DALI or KNX) at a constant brightness level depending on presence and daylight (constant light control)

Convenient adjustment using remote control, e.g. fully/semi-automatic, light values, switch-off delay times and button functions

Numerous variants (range, presence/motion, lighting and HVAC control) for all common interfaces (230 V, 1 - 10 V, 12 - 36 V, DALI, KNX)

Suitable for the control of LED lights via high-performance relay with tungsten pre-contact (230 V)

Simple programming using remote control and "blue mode" technology

Switching delay to avoid unwanted switching due to temporary variations in brightness

Manual override and staircase lighting function for detectors with push button input

Orientation light function for detectors with 1 - 10 V, DALI or KNX

- One-piece housing for easy installation in suspended ceilings
- Discreet appearance due to flush ceiling installation
- Variants with pre-assembled connection cables for WAGO WINSTA® and Wieland GST18® are available

The presence and motion detectors in the CE series intelligently switch the lighting and impress with their clever design. The concept enables flush ceiling installation and guarantees a correspondingly subtle appearance that, for the most part, only leaves the lens visible. Installation is quick and easy — even express.

- Stylish design with flat body
- Small junction box provides a large wiring space in every flush-mounted socket

Whether in an exclusive lounge or a prestigious board office — many locations feature elegant interior décor which demands equally attractive room technology. The perfect task for the FLAT presence and motion detectors: With their flat design, they have a particularly unobtrusive appearance, while a range of variants offers the perfect solution for every taste.

Parameterizable with ESY-Pen and ESY-App.

FLAT

QUALITY SENSOR SYSTEM IN AN ELEGANT DESIGN

Elegant design with a flat body (6 mm) and low installation depth (24 mm)

Covers with glass surfaces are available

Demand-driven lighting switching (230 V) or automatic light control (DALI or KNX) at a constant brightness level depending on presence and daylight (constant light control)

Instantly ready for use thanks to pre-installed factory settings (230 V, DALI)

Automatic configuration of light ballasts (DALI broadcast)

Simple configuration using remote control

Extensive individual configuration options for 47 communication objects (KNX)

Optimised to control LED lights whilst protecting the relay through zero-cross switching (230 V)

Small junction box provides a large wiring area in every flush-mounted socket

- Smallest design with a flat lens

The FLAT mini sensors have arguably the most unobtrusive design for an intelligent sensor and are therefore a suitable alternative for rooms where the technology should remain in the background as discreetly as possible. Their tiny housings mean that they retreat unobtrusively into the background, while nevertheless keeping a close eye on everything due to their high-quality sensor technology. At the same time, the particularly simple installation is impressive: Using a spring clamp or locking ring and, if required, through simple integration into brand switches.

ESY
CONTROL

Parameterizable with ESY-Pen and ESY-App.
More on pages 252 - 253 and at: esylux.com/esy-pen

FLAT MINI SAVES ENERGY WITHOUT BEING NOTICED

Particularly unobtrusive with a flat lens, an installation height of only 3 mm and a diameter of 33 mm

Automatic DALI light control at a constant brightness level, depending on presence and daylight (constant light control)

Immediately ready for use thanks to pre-installed factory settings

Automatic configuration of light ballasts (DALI Broadcast)

Simple programming using remote control

Manual override with DALI push buttons possible

Can be combined with additional FLAT mini detectors to expand the presence detection (master/slave)

Reduction in light output after expiration of the switch-off delay time to provide an orientation light in hallways and passageways; with integrated switch-off warning

Option to extend with DALI switch from ESYLUX for presence-dependent HVAC control

PRODUCT TYPES

FIELD OF DETECTION	DETECTION RANGE	
		Ceiling 6 m
	■ Diagonally (A)	∅ 6 m
	■ Frontal (B)	∅ 2 m
	■ Presence area (C)	∅ 2 m

- Proven technology and simple installation
- Suitable for controlling LED lights

The tried-and-tested technology in the Standard series is suitable for many different applications in buildings. Multiple variants of the presence and motion detector enable flexible application due to the different fields of detection, installation types and further details.

ESY
CONTROL

Parameterizable with ESY-Pen and ESY-App.

STANDARD

FIELD-TESTED AND FUTURE-PROOF

Two-part housing with sensor head and power box for quick and easy installation

Variants for recessed ceiling mounting and flush mounting; surface mounting with accessories

Demand-driven light switching

Setting options using remote control ("I" versions) or adjustment control, e.g. fully automatic/semi-automatic, light values, switch-off delay times and button functions

Optimised for the control of LED lights via high-performance relay with tungsten pre-contact (230 V)

Manual override with staircase lighting function for detectors with push button input

Push terminals with through-wiring option

Large wiring space due to low overall height of the power box

Wall-mounted variants compatible with common brands of switch series for a harmonious look

- Optimised for controlling LED lights
- High-quality technology at an entry-level price

ESYLUX

ESY
CONTROL

+

The BASIC presence and motion detectors offer a simply entry route into demand-driven building automation for intelligent light control. They are particularly suitable for cost-sensitive projects or areas of the building where simple functionality is sufficient — and due to the high-quality PIR and light sensors from ESYLUX still provide quality, energy efficiency and comfort.

Parameterizable with ESY-Pen and ESY-App.

BASIC

FULL ENERGY EFFICIENCY ON A SMALL BUDGET

Demand-driven light switching

Optimised for the control of LED lights via zero-cross switching (ceiling detector) or tungsten pre-contact (wall detector)

Setting options using remote control ("I" versions) or adjustment control, e.g. fully automatic/semi-automatic, light values, switch-off delay times and push button functions

Switching delay to avoid incorrect switching due to temporary, e.g. weather-related brightness variations

Manual override with staircase lighting function for detectors with push button input

Various installation options (ceiling, SMB, wall mounting)

Wall-mounted variants compatible with common brands of switch series for a harmonious look

- Smallest design with a flat lens

The LS FLAT mini KNX dimmer switch ensures that a better level of individuality, flexibility and energy efficiency can be achieved for any KNX lighting control system. Hidden in a tiny housing, its light measurement can be used to switch, regulate or control two separate light channels. It can align two external light values with its own value, thereby providing almost unlimited possibilities for multi-point measurements and cascading.

FLAT MINI SAVES ENERGY WITHOUT BEING NOTICED

Switches, controls and regulates up to two separate light channels

Can be combined with presence and motion detectors as well as additional light sensors for optimal control and regulation of large or complex room situations

Extensive measuring range of the internal light sensor of up to 10,000 lux

Flat lens with an installation height of only 3 mm and a diameter of 33 mm

Light channels can be configured extensively

With orientation light and twilight switch function

- Control unit for intelligent light control with plug-and-play installation
- Variant with SymbiLogic Technology for energy-efficient Human Centric Lighting
- Smart factory settings for immediate commissioning

The SMARTDRIVER is the control unit for ESYLUX lighting systems with simple plug-and-play installation and no programming required. The combination of control unit, ceiling lights and sensors delivers intelligent, presence-based and daylight-dependent controlled lighting — and at the highest configuration level it enables the biologically effective light with the SymbiLogic Technology!

ESY
CONTROL

Parameterizable with ESY-Pen and ESY-App.

SMARTDRIVER

PLUG-AND-PLAY CONTROL FOR THE BEST WORKPLACE LIGHT

Integrated constant light control for high energy efficiency

Variants with SymbiLogic Technology for energy-efficient Human Centric Lighting in the workplace

Two push button inputs for conventional buttons (230 V)

Compatible with selected DALI push buttons and DALI I/O devices

Manual override and call up of scenes in up to four separate light channels

Fast plug-and-play connection of ELC luminaires via RJ45 plug-in connections

Can be easily networked with additional ELC control units via the plug-in connection

Expansion possible with DALI lights via integrated DALI bus outputs

Variants with integrated KNX module for direct integration into KNX building automation (a KNX-DALI gateway is not required)

Devices in the DIN Rail series enable the conversion of binary or analogue signals to bus commands and vice versa. This allows conventional buttons and devices to be seamlessly integrated into digital bus systems.

DIN RAIL

SCALABLE MODULARITY FOR KNX

Enable the use of conventional buttons in a bus system

Enable simple switching operation (load-free) and analogue control (0–10 V)

For use in KNX (EIB), TP (twisted pair) bus system in conjunction with other KNX components

Parameter and function settings via ETS (Engineering Tool Software)

PRODUCT TYPES

Product group/product name	Item no.	Installation type	Dimensions (mm)							Core portfolio	New product			
			230 V (ON / OFF)	1 - 10 V	DALI	ELC	BT (Bluetooth)	KNX	UC / 12 - 36 V					
Binary input and output, 4-way, KNX (grey)	EC10430381	RM												

Note: Technical data for specific products can be found at www.esylux.com.

The actuators in the DIN Rail series convert digital telegram commands in bus systems into switching and setting actions. This enables the components in the building, such as the lighting, blinds, heating and ventilation, to be controlled conveniently.

DIN RAIL

SCALABLE MODULARITY FOR KNX

Modules for the conversion of bus commands into switching or dimming signals

Switching, dimming, blind and HVAC modules for the intelligent control of lighting and other consumers (e.g. blinds, heating and ventilation)

For use in KNX (EIB), TP (twisted pair) bus system in conjunction with other KNX components

Parameter and function settings via ETS (Engineering Tool Software)

Note: Technical data for specific products can be found at www.esylux.com.

The DIN Rail series interfaces and gateways enable the reciprocal conversion of digital commands between different bus systems, the connection of several bus devices via multiple bus lines/networks and the simple configuration of devices using a PC/laptop.

DIN RAIL

SCALABLE MODULARITY FOR KNX

Interfaces for connecting a PC/laptop for the configuration of KNX devices

Interfaces for linking KNX devices to several bus lines or higher-level networks/bus systems

KNX/DALI gateway for the integration of a DALI lighting system into KNX building automation

For use in KNX (EIB), TP (twisted pair) bus system in conjunction with other KNX components

Parameter and function settings via ETS (Engineering Tool Software)

- Pre-configured, ready-to-install ELC integrated solution with plug-and-play installation
- Smart factory settings for immediate commissioning
- SymbiLogic Technology for energy-efficient Human Centric Lighting

The ELC lighting systems are an ideal solution for workplace lighting in office buildings, educational and healthcare facilities. The sets are installed by plug-and-play with no programming required. The combination of the master and slave luminaires with directly integrated sensors and control unit delivers high-quality lighting with intelligent, presence and daylight dependent control — and at the highest configuration level it produces the biologically effective light of the SymbiLogic technology.

ESY
CONTROL

ESYLUX LIGHT CONTROL ELC

INTELLIGENT LIGHTING SYSTEMS FOR CLASSROOMS

Automated lighting solution with no programming required

Easy-to-install using plug and play

Cost-efficient due to intelligent system solution including SymbiLogic technology for energy-efficient Human Centric Lighting (Colour temperature: Tunable White, 2700 - 6500 K)

Flicker-free light for healthy and fatigue-free working

Available for different system dimensions

Ready-to-install solution for classrooms (60 m²), including LED recessed lights for system ceilings, sensors, control unit and other accessories (please note any special features and restrictions stipulated by the system ceiling manufacturer)

Up to 60% reduction in installation time

Long lifetime due to positioning of LEDs on rear

Suitable for computer workstations (UGR ≤ 19)

With accessories also suitable for ceiling mounting or ceiling surface mounting

- Freely configurable intelligent system lights
- Smart factory settings for immediate commissioning
- SymbiLogic Technology for energy-efficient Human Centric Lighting

The ESYLUX Light Control ELC technology is designed to radically simplify intelligent lighting and ventilation of rooms while at the same time offering the best possible light quality, even for those on a limited budget. You have the option to easily compile your own customised lighting system from various individual components, including ELC ceiling lights, ELC sensors, ELC control units (SMARTDRIVER), cables and other accessories.

All items can be installed via plug-and-play, the system can be used immediately without any programming effort and rapid modernisation is possible during ongoing operation. The integrated SymbiLogic technology delivers energy-efficient Human Centric Lighting, while demand-driven ventilation ensures an optimal indoor climate.

Parameterizable with ESY-Pen and ESY-App.

ESYLUX LIGHT CONTROL ELC

FREELY CONFIGURABLE INTELLIGENT SYSTEM LIGHTS

Prices per square metre include lights, presence detectors, controls and cabling, and exclude VAT and installation costs

Includes quality of life: SymbiLogic technology for energy-efficient Human Centric Lighting (light colour: Tunable White)

Error-free networking: simple grouping via plug-and-play

Individual control: convenient manual or digital operating options

Plug-and-play in a new dimension: easy to configuration in seven steps

INDOOR LIGHTING

EASY TO CONFIGURE IN SEVEN STEPS

PRODUCT TYPES

Note: Technical data for specific products can be found at www.esylux.com.

ESYLUX LIGHT CONTROL ELC

INDOOR LIGHTING | FREELY CONFIGURABLE LIGHTING SYSTEMS

- Prices per square metre include lights, presence detectors, controls and cabling, and exclude VAT and installation costs
- Includes quality of life: SymbiLogic technology for energy-efficient Human Centric Lighting (light colour: Tunable White)
- Error-free networking: simple grouping via plug-and-play
- Individual control: convenient manual or digital operating options
- Plug-and-play in a new dimension: easy to configuration in seven steps

- Energy-efficient lighting with high light quality
- Variants with Tunable White and ELC technology for easy plug-and-play installation
- DALI variants with SwitchDIM function for 230 V push button

The LED recessed lights in the CELINE series provide energy-efficient lighting in offices, conference rooms and other areas. They are designed for suspended system ceilings, but are also suitable for other installation types with suitable accessories — and are also impressive as special designs in intelligent lighting systems due to their high light quality.

ESY
CONTROL

Parameterizable with ESY-Pen and ESY-App.

CELINE

NUMEROUS ALTERNATIVES FOR THE MOST DEMANDING TASK OF SEEING

Usable as recessed light for system ceilings with concealed or visible mounting rails (please note any special features and restrictions of the system ceilings manufacturer)

Available for various system dimensions

With accessories also suitable for recessed surface mounting or surface mounting on ceilings

Robust, durable metal housing, housing front manufactured from one piece

High-quality diffuser made of PMMA plastic

Flicker-free light for healthy and fatigue-free working

Suitable for computer workplaces in accordance with DIN EN 12464-1 ($UGR \leq 19$)

Long lifetime due to the arrangement of LEDs on the back

Integrated ballast included in delivery

- Energy-efficient lighting with high light quality
- Variants with Tunable White and ELC technology for easy plug-and-play installation
- DALI variants with SwitchDIM function for 230 V button

The LED panel lights in the NOVA series provide energy-efficient lighting in offices, conference rooms and other areas. They are designed for suspended system ceilings, but are also suitable for other installation types with suitable accessories — and are also impressive as special designs in intelligent lighting systems thanks to their high light quality.

ESY
CONTROL

Parameterizable with ESY-Pen and ESY-App.

NOVA

UNIVERSAL SOLUTION WITH CHARACTERISTIC CENTRAL DIVIDER

Usable as recessed light for system ceilings with concealed or visible mounting rails (please note any special features and restrictions of the system ceiling manufacturer)

Available for different system dimensions

Also suitable for recessed ceiling mounting or surface ceiling mounting with accessories

Robust, durable metal housing, front made from a single piece

High-quality PMMA plastic diffuser

Flicker-free light for healthy and fatigue-free working

Suitable for computer workplaces in accordance with DIN EN 12464-1 (UGR \leq 19)

Long lifetime due to positioning of LEDs on rear

Integrated ballast for fast installation

DALI variants with SwitchDIM function for 230 V button

PRODUCT TYPES

LIGHT DISTRIBUTION

FIELD OF DETECTION

DETECTION RANGE

	Ceiling 8 m
■ Diagonally (A)	Ø 8 m
■ Frontal (B)	Ø 6 m
■ Presence area (C)	Ø 4 m

■ C0, ■ C90, ■ C0 / C90

Note: Technical data for specific products can be found at www.esylux.com.

- Usable as recessed light for system ceilings with concealed or visible mounting rails (please note any special features and restrictions of the system ceiling manufacturer)
- Available for different system dimensions
- Also suitable for recessed ceiling mounting or surface ceiling mounting with accessories
- Robust, durable metal housing, front made from a single piece
- High-quality PMMA plastic diffuser
- Flicker-free light for healthy and fatigue-free working
- Suitable for computer workplaces in accordance with DIN EN 12464-1 (UGR ≤ 19)
- Long lifetime due to positioning of LEDs on rear
- Integrated ballast for fast installation
- DALI variants with SwitchDIM function for 230 V button
- Rated life time $L_{80}B_{50}$ at 25 °C: 70000 h

- Flat design for universal use
- DALI variants with SwitchDIM function for 230 V push button
- Homogeneous light emission

With their low profile design, LED recessed lights in the STELLA series are well-suited to flexible applications in offices, learning environments and healthcare facilities. As such, they fulfil all requirements of contemporary light installations in terms of their straightforward handling, light quality and energy efficiency.

STELLA

FLAT AND FLEXIBLE

Easy installation at a low installation heights due to the particularly flat design (housing height: 10 mm)

Low weight for easy handling

Installation with no additional accessories, electronic ballast included in delivery

Electronic ballast simply plugs in to connect to the luminaire

Three installation types: Recessed light, also suitable for surface or pendant mounting with accessories

Two sizes for conventional system ceilings:
300 x 300 mm or 600 x 600 mm

Flicker-free light for healthy and fatigue-free working

Suitable for computer workstations (UGR ≤ 19)

DALI variants with SwitchDIM function for 230 V push button

- Provides glare-free direct light for vertical surfaces

The BOARDLIGHT provides perfect illumination of display boards or whiteboards in classrooms and training rooms. Their sleek and unobtrusive shape fits seamlessly into the overall interior design. The special construction of the lights and the directional arrangement of the LEDs ensures uniform and glare-free illumination of vertical surfaces. Various installation methods allow installation in almost any room configuration.

BOARDLIGHT

OPTIMAL ILLUMINATION OF PRESENTATION AREAS

Sleek and timeless design with high-quality, powder-coated metal housing

Glare-free direct light for vertical surfaces

Flicker-free light for healthy and fatigue-free working

Surface ceiling installation with no additional accessories, electronic ballast included in delivery

Different installation options available as accessories

- 
- Particularly resistant version with IK10 and IP65
 - Variants with integrated motion detector, optimised to control additional LED lights

The lights in the ALMA series are suitable for anywhere that requires robust yet stylish wall lighting or ceiling lighting. With IP65 protection type and IK10 impact resistance, these lights deliver continuous functionality even in adverse conditions, and the variants with integrated, invisible movement and light sensor technology enable demand-driven, energy-efficient operation.

ALMA

ELEGANT, ROBUST, OPTIONALLY INTELLIGENT

Protection type IP65

Impact resistance IK10

Variants with integrated motion detector (HF) for motion and daylight-dependent switching of lighting

Motion detector with switching output for master/master or master/slave networking

A metal plate prevents unwanted backwards detection, e.g. in neighbouring rooms

Easy to change the field of detection, switch-off delay time and target brightness via DIP switch in the light

Easy to install using plug-in terminals

Push terminals with through-wiring option

UV-resistant plastic diffuser

Flicker-free light

- Variants with integrated motion detector, optimised to control additional LED lights

The LED lights in the ELLEN series feature a beautiful, timeless design, making them ideal for ceiling or wall mounting in hallways, staircases and function rooms. The optional concealed motion and light sensor technology and high level of luminous efficacy ensure energy-efficient operation on demand.

ELLEN

ROBUST WALL LIGHTING INTELLIGENTLY NETWORKED

- Pivoting lamp head for targeted lighting
- Best glare suppression in the downlights sector

The wide variety of ALICIA downlights enables particularly personalised tailoring of the lighting atmosphere in entrance areas, conference rooms, hallways and staircases. The different beam angles and pivoting lamp head make them particularly suitable for spot and effect lighting, as well as for lighting in smaller areas.

ALICIA

VARIABLE LIGHT ACCENTS FOR EVERY ROOM

High-quality aluminium housing

Pivoting lamp head (by up to 25°)

Variants with different beam angles (15°, 24° and 36°)

Suitable for computer workplaces and technical drawing in accordance with DIN EN 12464-1 (UGR ≤ 16)

Flicker-free light for healthy and fatigue-free work

Integrated ballast included in delivery

Simple plug-in connection of the ballast to the light

- High-quality aluminium housing in square design

With their minimalist design, ELSA downlights are ideally suited for main lighting or as a stand-alone solution in conference rooms, hallways, staircases, entrance areas and sanitary facilities. Installation requires no additional accessories and the light ensures a harmonious appearance.

ELSA SQUARE

CLEAR DESIGN LANGUAGE FOR STRAIGHT-LINE ARCHITECTURE

High-quality square aluminium housing

Installation without additional accessories;
ballast included in delivery

Simple plug-in connection of the ballast to the light

Protection type IP20, below the ceiling IP44

Flicker-free light for healthy and fatigue-free working

ELSA SQUARE

INDOOR LIGHTING | DOWNLIGHTS

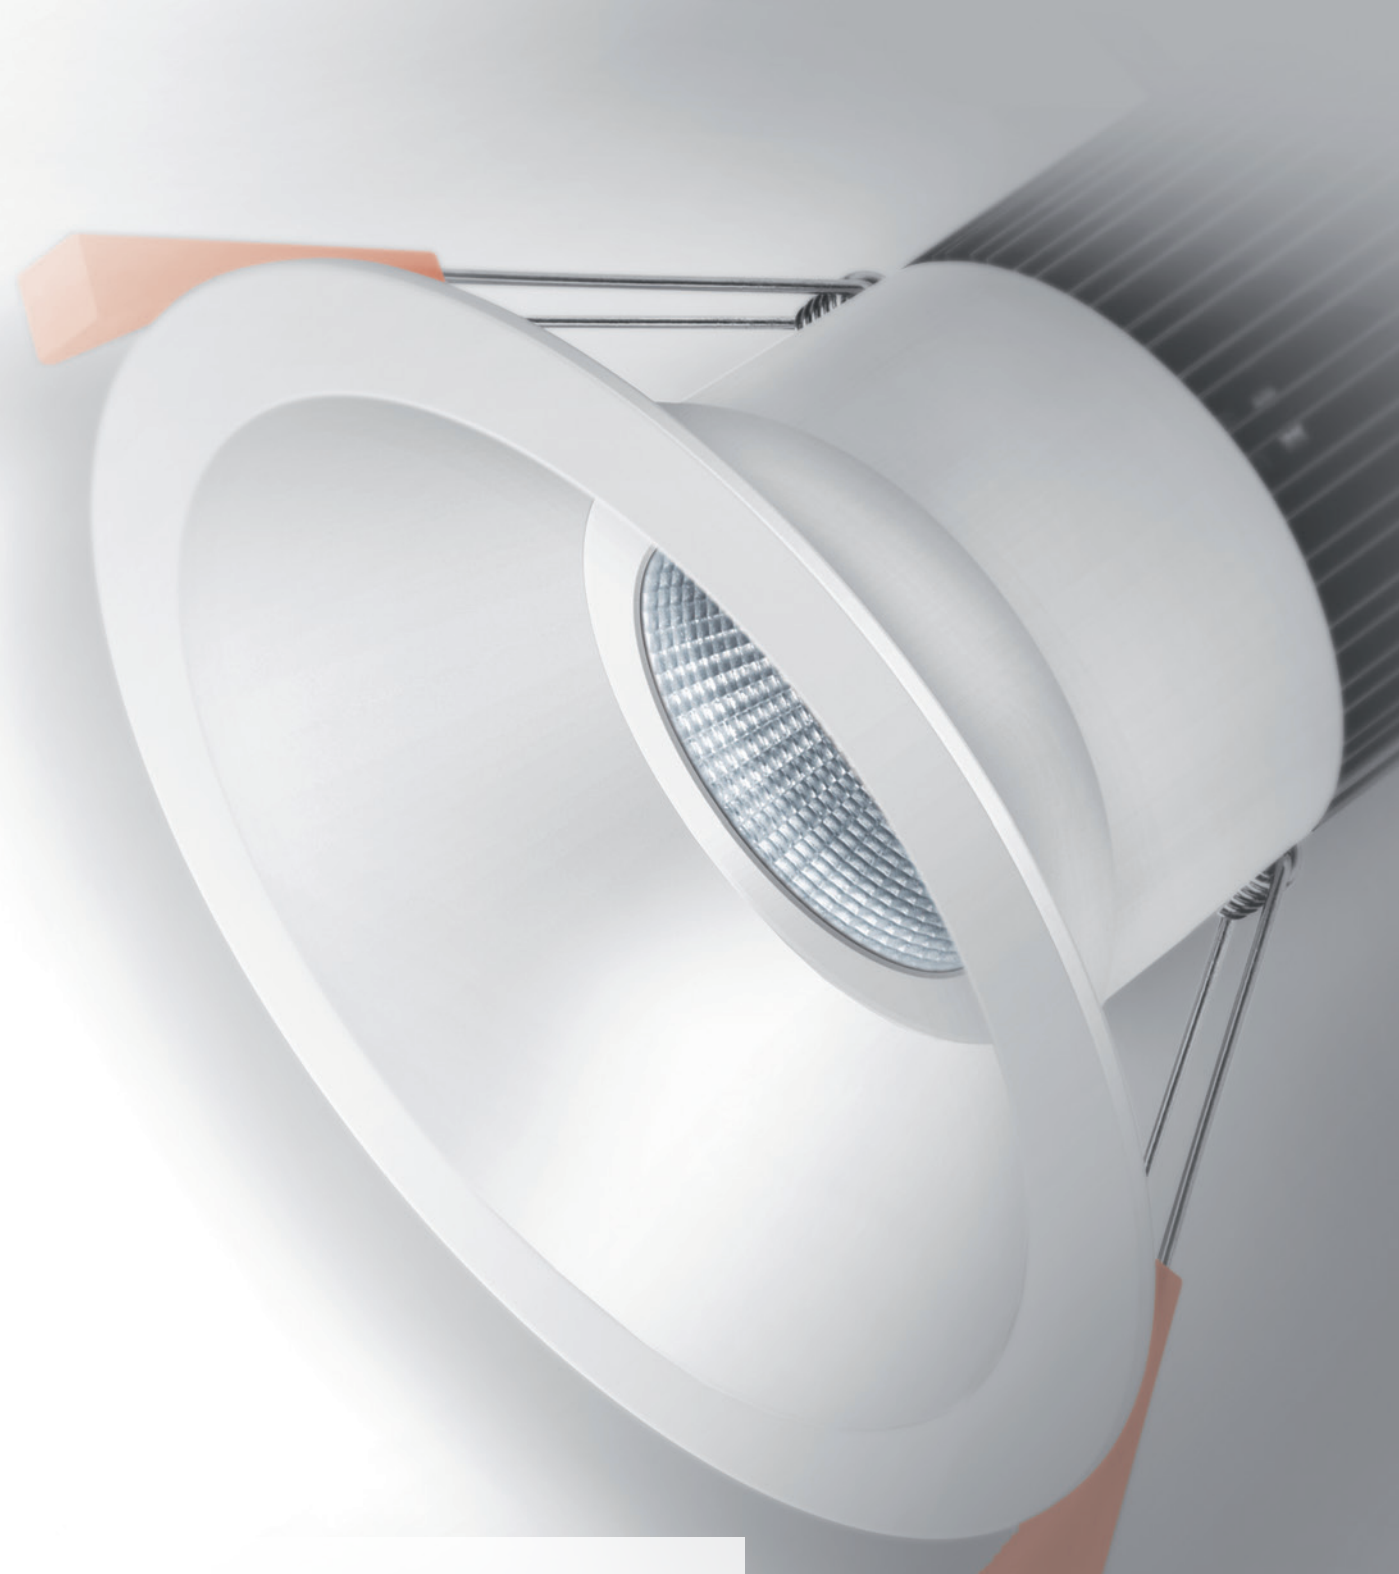

- High-quality square aluminium housing
- Installation without additional accessories; ballast included in delivery
- Simple plug-in connection of the ballast to the light
- Protection type IP20, below the ceiling IP44
- Flicker-free light for healthy and fatigue-free working
- Rated life time $L_{80}B_{50}$ at 25 °C: 40000 h

- Best glare suppression in the downlights sector

Whether it is individual effects or ambient lighting — with STINA downlights, both can be achieved in entrance areas, conference rooms, hallways and staircases. Variants with different beam angles provide freedom of design, while the LED arrangement and the design of the lamp head guarantee perfect, glare-free light.

STINA

CREATE EFFECTIVE LIGHTING MOODS

High-quality aluminium housing

Variants with a variety of beam angles (25°, 38° and 60°)

Suitable for computer workplaces and technical drawing in accordance with DIN EN 12464-1 (UGR ≤ 16)

Flicker-free light for healthy and fatigue-free working

Electronic ballast included in delivery

Simple plug-in connection of the electronic ballast to the luminaire

Variants with pre-wired junction box for fast installation and easy through-wiring

- Integrated sensor system for presence and daylight dependent constant light control
- Setpoint adjustment by manual dimming
- Closed luminaire head for simple cleaning

The ISABELLE free-standing light is an intelligent and particularly flexible lighting solution for individual workplaces that is easy to relocate and transport due to its high degree of portability. The light is characterised by the sleek design of the aluminium housing; the presence detector integrated in the lamp head enables demand-driven control of the direct and indirect light.

ESY
CONTROL

Parameterizable with ESY-Pen and ESY-App.
More on pages 252 - 253 and at: esylux.com/esy-pen

ISABELLE

FLEXIBLE INTELLIGENCE FOR THE BEST EFFICIENCY

Sleek, timeless design with high-quality, powder-coated aluminium housing

2 LED light panels (up/downlight) for direct illumination and indirect overhead light

Convenient operation using a button in the lamp head (switching, dimming/target brightness), adjustment control (switch-off delay time) or the accompanying infrared remote control

Suitable for screen-based workplaces in accordance with DIN EN 12464-1 (UGR \leq 19)

Two foot variants allow the free-standing light to be used with different desk types

Integrated presence detector for presence and daylight dependent lighting of the workplace (constant light control)

Transparent cover for the indirect light protects against contamination

Flicker-free light for healthy and fatigue-free working

Optimum stability even on uneven surfaces thanks to the height-adjustable screw-in feet

- Transparent cover for the indirect light protects against contamination
- Convenient operation using a button in the lamp head (switching, dimming/target brightness), adjustment control (switch-off delay time) or the accompanying infrared remote control
- Flicker-free light for healthy and fatigue-free working
- Suitable for screen-based workplaces in accordance with DIN EN 12464-1 (UGR ≤ 19)
- Optimum stability even on uneven surfaces thanks to the height-adjustable screw-in feet
- Two foot variants allow the free-standing light to be used with different desk types
- Rated life time $L_{80}B_{50}$ at 25 °C: 70000 h

- **SymbiLogic technology for energy-efficient Human Centric Lighting**
- **Variants with patented separable base for desks with continuous sides**
- **Award-winning, sophisticated premium design**

The PRANA+ free-standing lights, which has won multiple awards for its design, is a perfect mix of aesthetics, light quality and intelligent control. Thanks to the integrated presence detector, the biologically effective lighting of the SymbiLogic technology and intuitive, individual operation, this luminaire creates the optimum, demand-driven lighting atmosphere around the clock. What's more, thanks to its intelligent base concept and flexible lamp head, it fits any desk.

PRANA+

INTELLIGENT COMBINATION OF LIGHTING AND DESIGN

Premium design from "Peter Schmidt, Belliero & Zandée" with high-quality aluminium housing

SymbiLogic Technology for energy-efficient Human Centric Lighting (light colour: Tunable White, 2700 - 6500 K)

Integrated presence detector for presence dependent lighting of the workplace and adaptive constant light control for energy-efficient use of daylight

Two individually controllable LED light panels (up-/downlight) direct and indirect illumination

Convenient operation using the integrated touch panel or via smartphone, tablet or computer (Wi-Fi)

Easy storage of up to three individual light scenes

Multiple luminaires can be networked and synchronised for harmonious basic lighting in larger rooms that are not fully occupied, e.g. with 10% orientation light

Flicker-free light for healthy and fatigue-free working

Suitable for computer workplaces and technical drawing in accordance with DIN EN 12464-1 (UGR ≤ 16)

Lamp head individually adjustable for different table lengths, for optimal alignment on the work surface

- Variants with integrated sensor system for presence and daylight dependent constant light control
- Setpoint adjustment by manual dimming
- Closed luminaire head for simple cleaning

The ISABELLE pendant light is an elegant lighting solution for conference rooms, entrance areas and many other locations where an effective combination of style and light quality is important. Its sleek, timeless design enables easy integration into any environment, while the optional presence detector integrated in the luminaire head ensures control of glare-free direct and indirect light as required.

ESY
CONTROL

Parameterizable with ESY-Pen and ESY-App.

- Premium design and best light quality
- Variants with Tunable White
- Individually controllable direct and indirect light

The PRANA+ pendant light meets the highest standards for representative design and light quality. The puristic design of the high-quality aluminium body contributes to the creation of a successful lighting atmosphere just as much as the aesthetic connection cable, which elegantly replaces the suspension. Clever options provide greater convenience: Direct and indirect light with individually controllable brightness and a variable tunable white.

PRANA+

THE PINNACLE OF SOPHISTICATED LIGHTING

Premium design from Peter Schmidt, Belliero & Zandée with high-quality aluminium housing

High-quality PMMA plastic diffuser

The supply cable to the LED panel doubles as the light's suspension mount, creating an uncluttered look

Variants with two LED light panels (up-/downlight) for direct and indirect lighting

Variants with changing light colours
(light colour: Tunable White, 2700 - 6500 K)

Variants controlled via DALI or using 230 V push button

Flicker-free light for healthy and fatigue-free working

Suitable for computer workplaces and technical drawing in accordance with DIN EN 12464-1 (UGR ≤ 16)

Installation with no additional accessories, electronic ballast included in delivery

Pendulum length 300-1100 mm

INDOOR LIGHTING

- Special lens for outstandingly far-reaching illumination

The ELH series provides escape route lighting for single-battery operation with a lens construction that is specially designed for extensive areas — either for oval illumination of floors or circular illumination of large rooms. Its larger-than-average range reduces the number of lights required. The integrated DALI interface ensures high levels of control flexibility during operation and convenient maintenance.

ELH

RELIABLY ILLUMINATE EXTENSIVE AREAS

Single-battery 3-h emergency light

Suitable for surface or recessed ceiling mounting

Special lenses for the far-reaching illumination of large rooms (O) or long hallways (C)

Continual load monitoring with automatic weekly function test and six-monthly continuous function test

Test results indicated by coloured status LEDs

Optionally, operation in continuous or standby mode

Includes rechargeable NiCd battery with reverse polarity protected connection

Connection via push terminals with through-wiring option

Optional remote disconnection and status readout function via DALI bus

- Large wiring area with numerous line feeds

With the same basic housing, the ELX series LED emergency lights supplement the escape route signage in the SLX series with a reliable, energy-efficient escape route light. In addition to the large illumination area, they impress with their versatile installation options and easy installation. Designs for systems with single-battery or central battery operation are available.

ELX

IMPROVED SAFETY EASILY INSTALLED

Single-battery emergency light for escape route lighting with 3-hour or 8-hour emergency light duration

Basic housing made from UV-stabilised plastic with large wiring area and line feeds from several directions

Self-monitoring with coloured status indicator

Tamper-resistant function check can be executed by remote control or magnet

Optionally, operation in continuous or stand-by mode possible

Plug-in terminal with through-wiring function

Continual load monitoring with automatic weekly function test and six-monthly continuous function test

Test results shown on coloured status display

Wide range of accessories available for a variety of installation types

Replaceable, rechargeable NiCd battery with plug-in connection protected against reverse polarity

- Function control via remote control possible
- Flexible wall or ceiling mounting without accessories
- Variants with self-control are available

The SLA series single-battery emergency lights are a classic solution for escape route signage where a detection range of 14 metres is required. The simple function test takes place using the test key or remote control, alternatively a variant featuring self-control is available. A wide range of accessories enable use and easy installation in all common environments.

SLA

REMOTELY CONTROLLED, COMPACT EMERGENCY LIGHT FOR VARIOUS AREAS OF APPLICATION

Single-battery emergency light with 3 hour emergency light duration and 14 m viewing distance

Suitable for wall and ceiling mounting, wall arm mounting and pendulum mounting with accessories

Includes illuminant (LED or fluorescent lamp, depending on the variant)

Simple function test using conventional test key or using the convenient Mobil-SLi remote control; LED status indicator

Continuous and standby mode

Additional downwards light emission for better orientation in case of emergency

The detection range can be increased to 25 m using the SLA tall unit by adjusting the height of the light source

Includes rechargeable NiCd battery with reverse polarity protected connection

Connection via push terminals

Rear or side line entrance with elastic sealing membranes

- Dual function as escape route signage and emergency lighting
- Function test possible by remote control possible
- Can be switched off remotely when not in use

The SLE/SLF series single-battery emergency lights are a classic solution for escape route signage where an optional emergency light duration of eight hours is also required in addition to the appropriate detection range. The simple function test takes place using the test key or remote control. A wide range of accessories enable use and easy installation in all common environments.

Parameterizable with ESY-Pen and ESY-App.

- 3 h mode uses the symbol illumination and downlight function / 8 h mode uses the symbol illumination in emergency mode
- Variants for wall and surface ceiling mounting
- Self-control (SC) and fail-safe contact (opens in event of fault)
- Additional remote control connection (F+, F-) for disabling emergency lighting when building is not in use
- Includes illuminant (LEDs)
- Function test and self-control feature can be enabled using a conventional test key or using the convenient Mobil-SLi remote control
- Continual load monitoring with automatic weekly function test and annual continuous function test
- Test results indicated by coloured LEDs (green/red)
- Continuous and standby mode
- Includes rechargeable NiMH battery with reverse polarity protected connection
- Connection via push terminals

- Functional design for diverse installation types
- Can be switched off remotely when not in use
- Function control via remote control possible

The SLX series emergency lights provide variable LED solutions for indicating escape routes. Whether a classic, robust design, a modern, discreet design or a slim body especially for wall mounting: Due to the modular design concept, there is the right design for almost every requirement for the shared basic housing. In addition to the single-battery variants, versions for systems with central battery operation are also available.

Parameterizable with ESY-Pen and ESY-App.

SLX

MODULAR CONCEPT WITH EASY INSTALLATION

Single-battery emergency light with 3-hour or 8-hour emergency light duration and 14-m, 24-m or 32-m detection range

Variants for wall mounting and surface mounting on ceilings

Basic housing made from UV-stabilised plastic with large wiring area and line feeds from several directions

Three attachment options: flat cover, display panel or High Cover

Self-control (SC)

Includes illuminant (LEDs)

Function test and self-control feature can be enabled using a conventional magnet or using the convenient Mobil-SLi remote control

Continual load monitoring with automatic weekly function test and annual continuous function test

Test results indicated by coloured LEDs (green/red)

Continuous and standby mode

- Numerous settings, such as continuous or flashing light
- Can be used as a portable emergency light
- Maintenance-free rechargeable battery with charge status and capacity indicator

The portable SL P emergency light demonstrates impressively high luminosity and robustness. Whether it is continuous or flashing light, halogen or LED — clever details enable flexible use in buildings or on emergency vehicles. The SL P is also ideally suited for use as a portable spotlight.

SLP

MOBILE LIGHTING FOR ALL EVENTUALITIES

Continuous or flashing light can be selected as halogen floodlight or LED lighting using the front switch

Standby mode for switching on lights automatically in the event of a power failure

Maintenance-free rechargeable battery with charge status and capacity indicator

Separate wall mount/floor stand with charging device and connector for 230 V or 12–48 V DC (e.g. from a vehicle)

Spherical head horizontally and vertically rotatable

Rear magnet for attachment to iron or steel surfaces

Includes yellow filter

System for attaching 4 filters on rear

Note: Technical data for specific products can be found at www.esylux.com.

- Particularly flexible applications due to pivot joint
- Equipped with 360° creep protection
- KNX version with two dimmable light channels for orientation lights

The RC outdoor motion detectors are suitable for all common applications on building façades and projections due to the wide range of setting and installation options. A special bracket also enables trouble-free wall or ceiling mounting on inner and outer corners. 360° creep protection ensures unbroken coverage — and therefore maximum safety.

ESY
CONTROL

Parameterizable with ESY-Pen and ESY-App.

RC

RELIABLE DETECTION FOR FLEXIBLE USE

Movement and daylight dependent switching of outdoor lighting

Easy wall or ceiling mounting thanks to universal one-handed plug-in base with large wiring area and pivot joint

Special bracket for mounting on inner and outer corners available as an accessory

Immediately ready for use due to pre-installed factory settings

High level of safety due to 360° creep protection

Convenient modification of settings and functions using an infrared remote control (e.g. permanent switch on/off of lighting or automatic input of the current light value)

Simple through-wiring thanks to the double cable entry with elastic sealing membrane

Retractable setting elements prevent unintentional parameter adjustment

Wide range of options for adapting the detection range to the conditions at the property

- Time-dependent operating modes
- Password protection against unauthorised parameterisation
- Intelligent vandalism and sabotage protection (light switches on in the event of a malfunction)

The DEFENSOR motion detectors can be relied upon in every situation thanks to intelligent vandalism and sabotage protection or time-dependent operating modes. Particularly convenient: With the factory settings, the device can be commissioned immediately and the settings can be conveniently adjusted at a later date using the ESY Pen and ESY app. Tailored configuration of fields of detection and variants with switch-off delay times based on motion direction detection mean that this device can be controlled even more precisely, while the many mounting options ensure great flexibility.

ESY
CONTROL

Parameterizable with ESY-Pen and ESY-App.

DEFENSOR

EASILY OFFERS MORE PROTECTION

Movement and daylight-dependent switching of outdoor lighting

Time-dependent operating modes (230° and 280°)

Intelligent vandalism and sabotage protection (230° and 280°; light switches on in the event of a malfunction)

360° creep protection (230° and 280°; can be deactivated)

Switch-off delay times based on motion direction detection (230° and 280°)

Password protection against unauthorised parameterisation

Factory settings ensure immediate operability

Easy to configure using the ESY Pen and ESY app

Flexible sensor head for wall and ceiling mounting (230° and 280°)

Quick installation using push terminals up to 2.5 mm²

- Harmonious design
- Optimised for controlling LED lights in outdoor areas
- Individual fields of detection for two zones

The design of the MD-W series blends in harmoniously with the design of outer façades — entirely in keeping with common stair or wall lights. Different coloured covering caps available as accessories enable the housing to be tailored to the respective building.

ESY
CONTROL

Parameterizable with ESY-Pen and ESY-App.

MD-W

FUNCTIONALITY MEETS DESIGN

Motion and daylight dependent switching of outdoor lighting

Harmonious design with various covering caps

Simple wall mounting thanks to universal one-handed plug-in base with large wiring area

Instantly ready to use due to pre-installed factory settings

Convenient modification of settings and functions thanks to IR remote control (e.g. permanent switch on/off of lighting or automatic input of the current light value)

Simple through-wiring due to double line entrance with elastic sealing membrane

Simple adjustment of the detection range thanks to lens covers that can be cut to size and mechanically adjustable covers

Concealed setting elements prevent unintentional parameter adjustment

Optimised for the control of LED lights via high-performance relay with tungsten pre-contact

OUTDOOR AUTOMATION

- Time-dependent operating modes (TS T)
- Password protection against unauthorised parameterisation
- High overvoltage protection (surge 2 kV, burst 4 kV)

The DEFENSOR twilight switches reliably and discreetly increase safety around the building. Once darkness falls, they automatically or semi-automatically switch on the lights in the event of insufficient ambient lighting or can also be controlled via time-dependent operating modes. They therefore guarantee flexibility and energy efficiency, as well as protecting the relay during the operation of LED lights thanks to zero-cross switching. With the factory settings, the device can be commissioned immediately and the settings can be conveniently adjusted at a later date using the ESY Pen and ESY app.

ESY
CONTROL

Parameterizable with ESY-Pen and ESY-App.

- Easy wall mounting due to universal one-handed plug-in base and large wiring area
- Variants with integrated motion detectors, optimised for controlling additional LED lights

The LED wall lights in the OL/AOL series are a timeless classic due to their elegant appearance and can be stylishly placed in any environment and improve the look of façades or entrance areas. The durable, die-cast aluminium housing makes them highly reliable and the optionally integrated motion detector ensures convenient, energy-efficient operation. Clever details simplify installation.

OL/AOL

TIMELESS DESIGN FOR ALL FAÇADES

Elegant design with high-quality aluminium housing

- Resistant / protected against sea air and dirt
- Variants with integrated motion detectors feature orientation lights and twilight switch functions

The robust ALVA wall and ceiling lights can be used in a flexible manner in façades and entrances and optionally feature an intelligent motion detector that guarantees both energy-efficient and convenient operation. Alternatively, they are also suitable for use as house number lights.

ESY
CONTROL

Parameterizable with ESY-Pen and ESY-App.
More on pages 252 - 253 and at: esylux.com/esy-pen

ALVA

RESISTANT AND INTELLIGENT

High-quality aluminium housing, resistant / protected against sea air and dirt

High level of resistance to cleaning agents (anti graffiti effect)

Variants with integrated motion detector for demand-oriented control of full lighting/orientation light; incl. twilight switch function

Motion detector can be configured conveniently using infrared remote control (accessory)

Push button input for switching between OFF, motion detector activated – 100%, 4 h OFF and 4 h ON

Meets requirements for installation in public areas (IP65, IK09)

Optional number set available for use as a house number light

OUTDOOR LIGHTING

- Resistant / protected against sea air and dirt
- Simple installation with one-handed plug-in base and large wiring area

The high-quality ALVA up-/downlights are particularly suitable for the atmospheric illumination of building façades and passageways. Their tapered light cast upwards and downwards and two integrated light halos create a fascinating light effect. Multiple variants with different beam angles ensure a high degree of design flexibility.

ALVA

ATMOSPHERIC LIGHT FOR FAÇADES

High-quality aluminium housing, resistant / protected against sea air and dirt

High level of resistance to cleaning agents (anti graffiti effect)

Variants with a variety of beam angles (13°, 28° and 50°)

Meets requirements for installation in public areas (IP65, IK09)

Simple wall mounting due to universal one-handed plug-in base and large wiring area

OUTDOOR LIGHTING

- Resistant / protected against sea air and dirt
- Variants with integrated motion detectors feature orientation light and twilight switch function
- Motion detector enables the energy-efficient control of further lights and switch actuators

The bollard lights in the ALVA series feature a high-quality design and are ideal for the intelligent lighting of paths, forecourts and driveways or green spaces. Their durability and die-cast aluminium housing ensure they meet all requirements for installation in public areas. The optional integrated motion detector provides energy-efficient, convenient operation.

ESY
CONTROL

Parameterizable with ESY-Pen and ESY-App.

ALVA

ROBUST PATH LIGHTING CAN BE NETWORKED INTELLIGENTLY

High-quality aluminium housing, resistant / protected against sea air and dirt

High level of resistance to cleaning agents (anti-graffiti effect)

Variants with motion detector for motion and daylight dependent switching of lighting and the option of DALI networking; integration of 230 V terminal devices via DALI switch

DALI bus voltage supply integrated in lights with motion detectors

Variants with different light emissions (180° or 360°), different luminaire heights and different diameters

Meets requirements for installation in public areas (IP65, IK09)

Basic lighting for increased safety in outdoor areas (orientation light)

Concealed LED arrangement, no glare from direct light

DURABLE SYNER

ALVA OUTDOOR LIGHTS AND DEFENSOR

Even just the matching colour schemes and elegant design of the ALVA outdoor lights from ESYLUX makes them the ideal partner for the DEFENSOR series. Combine the DEFENSOR protection functions with an aluminium housing that is protected against sea air, a high level of impact resistance and the durability of the LEDs used, and you have an intelligent and extremely reliable lighting solution.

— 230 V

Controlling bollard lights and up-/downlights from the ALVA series using a DEFENSOR motion detector creates a lighting solution for outdoor areas that is every bit as intelligent as it is visually harmonious. Alternatively, or even in addition, the ALVA series includes bollard lights with integrated DALI motion detectors, for instance. ▲

GY

ALVA SERIES LED OUTDOOR LIGHTS

- Robust aluminium housing that is protected against sea air
- Dirt-resistant anti-graffiti effect
- Variants with integrated motion detector

- High-quality technology at an entry-level price
- Compact, unobtrusive aluminium housing
- Variants with integrated motion detector

ESYLUX®

The compact floodlights in the BASIC OFL/AFL entry-level series are suitable for the space-saving illumination of traffic routes, garages and squares or the illumination of façades and signs. The optional integrated motion detector enables automatic and energy-efficient operation.

BASIC OFL/AFL

ENERGY EFFICIENCY AT AN ENTRY-LEVEL PRICE

Compact aluminium housing for unobtrusive installation

Stainless steel ITD special bracket for simple mounting to a wall, inner corner or outer corner

With optional motion detector for motion and daylight dependent switching of light

Protection type IP65

- Separate connection box for easy installation
- Variants with integrated motion detectors, optimised for controlling further LED lights

The robust LED floodlights in the SUN OFL/AFL series are suited to brightly illuminating traffic routes, squares and garages — or for illuminating façades, signs and billboards. The optional motion detector provides automatic and therefore energy-efficient, convenient operation, while clever details simplify installation.

SUN OFL/AFL

ROBUST, DURABLE AND EVEN MORE EFFICIENT AS A GROUP

High-quality die-cast aluminium housing, stainless steel external screws

Easy installation with separate connection box (no need to open light housing)

Stainless steel, special ITD bracket for simple mounting on walls, inner corners or outer corners

Variants with integrated motion detectors for motion and daylight dependent light switching

Motion detector with zero-cross switching to protect the relay

Simple adjustment of the range and field of detection due to the revolving and tilting detector axis

Motion detector with switching output for master/master or master/slave networking

Protection type IP65

Overvoltage protection category II (up to 2.5 kV)

- Glare-free and uniform light emission
- Variants with integrated motion detector

With their rear projection technology, OFR/AFR LED floodlights generate a powerful yet glare-free light that illuminates paths, squares and façades. What's more, they are optimally protected due to the aluminium housing and are particularly flexible thanks to the horizontally or vertically adjustable luminaire head. The optional integrated motion detector ensures automatic energy efficiency.

OFR/AFR

A BRIGHT LIGHT WITHOUT GLARE

Housing made from aluminium and UV-stabilised plastic

Rear projection technology for glare-free and uniform light emission

Simple wall mounting due to universal one-handed plug-in base and large wiring area

Simple through-wiring thanks to the double cable entry with elastic sealing membrane

Plug-in terminal for through-wiring of the protective conductor included

Variants with integrated motion detector

Simple adjustment of the range and field of detection due to the lens cover, which can be cut to size

OFR/AFR

OUTDOOR LIGHTING | FLOODLIGHTS

- Housing made from aluminium and UV-stabilised plastic
- Rear projection technology for glare-free and uniform light emission
- Simple wall mounting due to universal one-handed plug-in base and large wiring area
- Simple through-wiring thanks to the double cable entry with elastic sealing membrane
- Plug-in terminal for through-wiring of the protective conductor included
- Variants with integrated motion detector
- Simple adjustment of the range and field of detection due to the lens cover, which can be cut to size

- Protected against salty sea air
- Extensive illumination
- Freely rotatable, twin-axle luminaire head for high flexibility

Illuminating large and medium-sized wall surfaces and spaces is a real speciality of the OF LED floodlight, thanks to its wide, freely rotatable, twin-axle luminaire head and high level of luminosity. The variants with a wall arm mounting also increase the distance of the light from any facade.

OF THE AREA IN FOCUS

High quality, UV-resistant and weather-resistant die-cast aluminium housing protected against sea air

Corrosion-free, stainless steel mounting screws

One-handed plug-in base for quick and easy installation

Simple through-wiring due to the double cable entry with elastic sealing membrane

Adjustment aid on the joint for easy alignment of the luminaire

PRODUCT TYPES

LIGHT DISTRIBUTION

- Protected against salty sea air
- The freely rotatable, twin-axle luminaire head offers high flexibility

Whether they are used to illuminate façades, paths or signs with a high-precision or wide-angle beam, these high-quality OS LED spotlights set the right tone wherever they feature. The designer lamp heads with twin axles can be freely rotated and positioned as required, while the optional wall arm mounting can be used to increase the distance between the luminaire and the building if necessary.

OS ACCENTED FACADE LIGHTING

High quality, UV and weather-resistant die-cast aluminium housing protected against sea air

Corrosion-free, stainless steel mounting screws

One-handed plug-in base for quick and easy installation

Double line entrance with elastic sealing membrane

Adjustment aid on the joint for easy alignment of the luminaire

- Robust aluminum housing

The energy-efficient LED work spotlights from the SUN PL series enable precise working on building sites, in workshops and in other places with little or no lighting. The variant with rechargeable battery provides especially high flexibility — not just in power cuts.

SUN PL

ROBUST MOBILE LIGHTING

High-quality die-cast aluminium housing, stainless steel external screws

Stable, non-slip base for uninterrupted working

H07RN-F rubber-insulated cable with earthed safety plug (length 5 m)

Telescope tripod available as optional accessory

Variant with rechargeable battery operation (RE), battery charger for 230 V and 12 V included in delivery

ALWAYS READY WITH THE RIGHT TOOL

The ESY-Pen and the ESY-App make commissioning and parameterisation easy.

With the ESY-App, you have access to your project library at all times! And for optimum flexibility, you can create projects in your office and then easily transfer the configuration when at the construction site.

Previously implemented configurations can be stored and transferred to products of the same type via the ESY-Pen using the cloning function.

ITH

EASY PARAMETRISATION, REMOTE CONTROL, LIGHT MEASUREMENT AND MOBILE PROJECT MANAGEMENT

Whether you use presence detectors, outdoor lights with motion detectors or lighting systems with ESYLUX Light Control, the ESY-Pen and the ESY-App ensure you always have the right tools for all remotely controlled ESYLUX solutions.

Bluetooth control for
Android and iOS

MOBILE PROJECT MANAGEMENT

The ESY-Pen and the ESY-App allow users to save, access and transfer configured projects:

- Each project can be saved with a unique name and description in the ESY-App
- No project is too big for the ESY-App: Up to 64 floors can be created, each with up to 64 rooms and up to 64 devices per room
- Within the ESY-App, a few clicks take the user from the project to the room of their choice where they can quickly identify, select and configure ESYLUX products
- Configured projects can be stored in the ESY-App or forwarded on to other users as necessary. Previously stored configurations can be easily transferred to products of the same type via the ESY-Pen using the cloning function
- The project documentation is integrated into a project report that can then be sent as a PDF document and also printed off as required

The project documentation is integrated into a PDF report that can then be emailed and printed off as required.

PRESENCE AND MOTION DETECTORS

THE DIFFERENCES

Both device types have a sensor system for motion detection and a light sensor system for brightness measurement. Nevertheless, presence detectors and motion detectors are each suitable for different applications.

MOTION DETECTORS

Motion detectors detect larger movements within their detection range, for example when a person is walking forward or gestures in a disorderly manner. As soon as motion detectors detect a movement, they measure the brightness once with their light sensor technology. If this is below the previously set brightness value, they activate the lighting. If they no longer detect any movement, they switch off the light again at the end of the follow-up time.

APPLICATION AREAS

Motion detectors, with their simpler motion sensor technology and unique light measurement, are ideally suited for passageways, sanitary areas and side rooms with little daylight or short-term use, as well as for outdoor applications.

PRESENCE DETECTORS

Presence detectors also detect larger movements, but within their presence range they also register fine motoric and even the smallest movements such as typing on a PC keyboard. Unlike motion detectors, presence detectors can therefore detect the permanent presence of people - for example at a desk in the office.

If movement is detected and brightness is insufficient, presence detectors activate the lighting. Unlike motion detectors, however, they do not measure light just once but repeat the measurement as long as they detect presence. If the required illuminance is already achieved by daylight or ambient light, presence detectors switch off the artificial light in an energy-saving manner even if there is a human presence. Alternatively, they deactivate the lighting at the end of the switch-off delay time.

Presence detectors with constant-light control provide even greater convenience and energy efficiency when people are present. Because based on their continuous light measurement, they can continuously adjust the illuminance of the artificial light to the natural lighting conditions by dimming.

APPLICATION AREAS

Presence detectors are ideally suited for indoor areas where people are permanently present, especially in areas with daylight, due to their more precise motion detection and continuous light measurement. They are therefore preferred for use in offices, classrooms or recreation rooms, for example.

DIFFUSERS AND COLOUR TEMPERATURE

AN OVERVIEW

Diffusers have a significant influence on the optical perception and glare suppression of the lighting, and the colour temperature changes the emotional and biological effect of the light. ESYLUX offers a suitable selection.

DIFFUSERS AND COVERS

Different combinations of finely structured surfaces and stronger or weaker opacity give ESYLUX lighting an equally attractive and characteristic appearance.

Diffuser surface:

DDP = micro-prismatic

LDP = linear-prismatic

Diffuser opacity:

TR = transparent

OP = opal

SO = semi-opal

COLOUR TEMPERATURE

The colour temperature in Kelvin describes the light colour of a light source and ranges from below 3000 Kelvin (warm white) to over 5300 Kelvin (daylight white) with common light sources. ESYLUX lighting solutions with SymbiLogic technology and Tunable White offer variable control between the two ranges and energy-efficient Human Centric Lighting.

2700 - 6500 K = Tunable White

3000 K = warm white

4000 K = neutral white

5000 K = daylight white

PRODUCT NAMING

SIMPLY DECODED

Our naming scheme in the lighting category complies with the international industry standard and draws its components from the most important features and performance data. Following the series name and the device category, this includes, for example, abbreviated designations for luminous flux, CRI value or diffuser characteristics. So you can see instantly which lighting component or solution is suitable for the requirements of your project.

PL	= Portable light
3. DIFFUSER OPACITY	
TR	= Transparent
4. LUMINOUS FLUX	

Differentiator	Description
5. COLOUR RENDERING INDEX AND TEMPERATURE	
850	= CRI >80; 5000 K
6. FUNCTION	
RE	= Rechargeable battery
7. COLOUR	
BK	= Black

A TOOLTIP HELPS ON THE WEB

If you are in the product section of the ESYLUX website and do not know one or more components of a product name, simply move the mouse over the respective name sections. A tooltip then automatically displays a short description.

ESYLUX. SOLUTIONS PRODUCTS INNOVATIONS COMPANY SERVICE PR

Home | Indoor lighting | Recessed lights | NOVA | MASTER / 2700 - 8500 K / 600 x 600 mm / 30 W

RECESSED LIGHTS
NOVA

DIFFUSOR SURFACE: MICRO-PRISMATIC

NOVA PNL 600 DDP TR 4000 8TW IP20 IR PD ELC M

Item number: EQ10112638

The LED panel lights in the NOVA series provide energy-efficient lighting in offices, conference rooms and other areas. They are designed for suspended system ceilings, but are also suitable for other installation types with suitable accessories — and are also impressive as special designs in intelligent lighting systems thanks to their high light quality.

Whether luminous flux, light colour or control technology: the tooltip has the right answer for everything ▶

PRODUCT NAMING

SIMPLY DECODED

The product names of our presence and motion detectors are based on a structure that has been familiar to our customers for many years and allows them to easily navigate through our series - for example FLAT, COMPACT or ATMO.

We harmonise series that will be launched on the market from 2020 onwards according to the basic principles of the naming scheme in the lighting category. In the medium to long term, this gives you an even easier overview of our entire portfolio.

DEFENSOR shows an example of the introduction of a new series.

Example detectors: COMPACT series

Differentiator	Description
1. DEVICE CATEGORY	
2. SERIES	
ATMO	= Multisensor
C	= Compact
mini	= Small recessed ceiling mounted version
CE	= Compact Express (Recessed ceiling version)
FLAT	= Flat construction
BASIC	= Entry-level products
STANDARD	= State-of-the-art technology
RC	= High quality outdoor detectors
3. ANGLE OF DETECTION	= In degrees (°)
4. REMOTE CONTROL	= i = infrared
5. Ø DETECTION RANGE	= In metres (m)
6. FUNCTION	
plus	= HVAC-contact
touch	= Operation possible by touch
MIC	= Integrated acoustic sensor
DRY	= Break contact/floating
DUO	= 2-channel light measurement

Differentiator	Description
DIM	= Continuous lighting control
R	= Relay output
ELC	= ESYLUX Light Control
BMS	= Building Management Systems
PS	= Power Supply included
DALI / DALI-2	= Digital Addressable Lighting Interface
KNX	= Fieldbus for building automation
UP	= Software upgrade
ECO	= Reduced functionality
UC	= 12 - 36 V AC/DC
WH / Warehouse	= Suitable for high-bay storage
Corridor	= Suitable for corridors / hallways
SM	= Surface-mounted version
SMB	= Surface-mounted version including box
FM	= Flush-mounted version
GST	= Pre-assembled WIELAND/GST 18-line
WAGO	= Pre-assembled WAGO WINSTA® line
Slave	= Auxiliary post

G DETECTORS

Example outdoor motion detectors: DEFENSOR series

DEFENSOR	MD	280°	40	IR	1C	IP55	WH
1.	2.	3.	4.	5.	6.	7.	9.

Differentiator	Description
1. SERIES	
2. DEVICE CATEGORY	
MD	= Motion detector
3. ANGLE OF DETECTION	
	= In degrees (°)
4. DETECTION RANGE	
Angle of detection up to 180°	= Radius in metres (m)
Angle of detection from 180°	= Diameter in metres (m)
5. COMMUNICATION	
IR	= Remote control (infrared)

Differentiator	Description
6. NUMBER OF LIGHT CHANNELS	
1C	= 1 light channel
2C	= 2 light channels
7. IP PROTECTION CLASS	
8. COLOUR	
AN	= Anthracite
WH	= White

SIMPLY BEING A GOOD PARTNER: FROM PLANNING THROUGH TO THE LAST DETAIL

LET US TACKLE NEW TASKS TOGETHER

For ESYLUX, excellent service above all means being close to the customer. Our experts can provide advice and support in all phases of your project – from planning energy-efficient solutions and selecting products through to installation and reliable support via our technical hotline. What is more, you benefit from our helpful tools, training opportunities for planners, traders and technicians in the ESYLUX Academy, and an extended manufacturer's warranty.

Why not put ESYLUX to the test: We accept any challenge and look forward to implementing exciting projects with you. And we will prove that everybody benefits from demand-driven automation of optimum light and good-quality air: a gain for people, for the environment, and for your balance sheet. Welcome to ESYLUX.

THIS PRODUCT OVERVIEW IS INTENDED AS A WORKING BASIS FOR BUSINESSES.

The information in this product overview is not binding in relation to the illustrations, design, size and colour of the products shown. We reserve the right to make changes to technology and designs with a view to improving the quality of the products. For any technical questions or to order promotional material, please contact your wholesaler or contact the ESYLUX sales department directly. Subject to error.

ESYLUX products are only supplied to trade specialists through the specialist wholesaler.

ESYLUX ACADEMY

Informing and instructing our customers is of utmost importance to us.

SUPPORT FOR PLANNING AND PROJECT MANAGEMENT

From project planning through to completion, we are always at your side when you need us.

EXTENDED MANUFACTURER'S WARRANTY

Quality is often just an empty promise. For us, it is an obligation.
