Monitor systems for lead-acid traction batteries. General technical requirements

— 2022—06—01

1

Monitor system (MS) is a system that monitors the state of the battery and provides information about the state of the battery to the user.

2

3

3.1 The MS shall be able to monitor the state of the battery and provide information about the state of the battery to the user.

3.2 The MS shall be able to monitor the state of the battery and provide information about the state of the battery to the user.

4

4.1

4.1.1 The MS shall be able to monitor the state of the battery and provide information about the state of the battery to the user.

4.1.2 The MS shall be able to monitor the state of the battery and provide information about the state of the battery to the user.

4.2

4.2.1 The MS shall be able to monitor the state of the battery and provide information about the state of the battery to the user.

4.2.2 The MS shall be able to monitor the state of the battery and provide information about the state of the battery to the user.
